

This information collection also documents an estimate of the annual public burden as it relates to the application process for federal student aid. The Applicant Burden Model (ABM), measures applicant burden through an assessment of the activities each applicant conducts in conjunction with other applicant characteristics and in terms of burden, the average applicant's experience. Key determinants of the ABM include:

- The total number of applicants that will potentially apply for federal student aid;
- How the applicant chooses to complete and submit the FAFSA (e.g., by paper or electronically via FOTW®);
- How the applicant chooses to submit any corrections and/or updates (e.g., the paper SAR or electronically via FOTW Corrections);
- The type of SAR document the applicant receives (eSAR, SAR acknowledgment, or paper SAR);
- The formula applied to determine the applicant's expected family contribution (EFC) (full need analysis formula, Simplified Needs Test or Automatic Zero); and
- The average amount of time involved in preparing to complete the application.

The ABM is largely driven by the number of potential applicants for the application cycle. The total application projection for 2015–2016 is based upon two factors—estimates of the total enrollment in all degree-granting institutions and the percentage change in FAFSA submissions for the last completed or almost completed application cycle. The ABM is also based on the application options available to students and parents. The Department accounts for each application component based on web trending tools, survey information, and other Department data sources.

For 2015–2016, the Department is reporting a net burden decrease of 2,081,212 hours.

Title of Collection: Trends in International Mathematics and Science Study 2015 (TIMSS:2015) Main Study.

OMB Control Number: 1850-0695.

Type of Review: A revision of an existing information collection.

Respondents/Affected Public: Individuals or households.

Total Estimated Number of Annual Responses: 30,187.

Total Estimated Number of Annual Burden Hours: 27,301.

Abstract: We are announcing a second 30-day comment period for the 2015 Trends in Mathematics and Science Study (TIMSS) because at the August 2014 meeting of the TIMSS National Research Coordinators, representatives from the participating countries agreed to add several questions to the international student, teacher, and school background questionnaires.

TIMSS is an international assessment of fourth and eighth grade students' achievement in mathematics and science. Since its inception in 1995, TIMSS has continued to assess students every 4 years (1995, 1999, 2003, 2007, 2011). Participation in this study provides data on current and past education policies and a comparison of U.S. education policies with its international counterparts. Periodically, TIMSS has also conducted an assessment of advanced mathematics and physics of students at the end of secondary school (1995 and 2008). The United States participated in TIMSS Advanced in 1995, but not in 2008. Because of the current strong policy interest in preparedness for college and for careers in science, technology, engineering, and mathematics (STEM) fields, the U.S. plans to participate in TIMSS Advanced in 2015. This submission is for the 2015 TIMSS and TIMSS Advanced main study data collection that will take place in March-May, 2015.

DEPARTMENT OF EDUCATION**Notice of Proposed Collection Requests; Comment Request**

AGENCY: Department of Education

ACTION: Correction Notice

SUMMARY: On August 19, 2014, the U.S. Department of Education published a 60-day comment period notice in the **Federal Register** (Page 49069, Column 1) seeking public comment for an information collection entitled, "Generic Application Package for Departmental Generic Grant Programs." This notice was published in error. The comment period for this information collection request ends on September 2, 2014.

On July 3, 2014, the U.S. Department of Education published a 60-day comment period notice in the **Federal Register** (Page 38017, Column 1) seeking public comment for an information collection entitled, "Generic Application Package for Discretionary Grant Program." The abstract omitted a section of the CFR where selected criteria are also covered under generic applications. The abstract is corrected as follows.

The Department is requesting an extension of the approval for the Generic Application Package that numerous ED discretionary grant programs use to provide to applicants the forms and information needed to apply for new grants under those grant program competitions. The Department will use this Generic Application package for discretionary grant programs that: (1) Use the standard ED or Federal-wide grant applications forms that have been cleared separately through OMB under the terms of this generic clearance as approved by OMB and (2) use selection criteria from the Education Department General Administrative Regulations (EDGAR); selection criteria that reflect statutory or regulatory provisions that have been developed under 34 CFR 75.209, or a combination of EDGAR, statutory or regulatory criteria or other provisions, as authorized under 34 CFR 75.200 and 75.209. The use of the standard ED grant application forms and the use of EDGAR and/or criteria developed under §§ 75.200 and 75.209 promotes the standardization and streamlining of ED discretionary grant application packages.

The Acting Director, Information Collection Clearance Division, Privacy, Information and Records Management Services, Office of Management, hereby issues a correction notice as required by the Paperwork Reduction Act of 1995.
