Each IPA is required to submit an annual report to the Council by April 1st of the following year under a set of reporting requirements provided in the Amendment 91 regulations.

The IPA report is the primary tool through which the Council evaluates the effectiveness of the IPA concept in reducing Chinook salmon bycatch in the Bering Sea pollock fishery. Information gathered through the annual reports is necessary for the Council to evaluate the salmon bycatch management measures and to provide the public with information about how the programs operate and bycatch reduction under these programs.

The Council makes the annual report available to the public; the IPA reports are posted on the NMFS Alaska Region website at
