

## Supplemental Document

### Risk Stratification of Interviewees:

- High Risk: The index case's blood or body fluids (including but not limited to feces, saliva, sweat, urine, vomit, and semen) came in contact with the interviewee's bare skin (intact or broken) or mucous membranes (eyes, mouth, nose).
- Some Risk: Direct contact while using PPE with a person with Ebola while the person was symptomatic in a country with widespread Ebola transmission.
- Low (but not zero) Risk: Interviewee traveled on an aircraft with a person with Ebola while the person was symptomatic. Check one of the following for all passengers.
  - Passengers sitting within 3 feet of a person with Ebola
  - Passengers sitting beyond 3 feet of a person with Ebola
- No Identifiable Risk: Interviewee did not have any of the Low, Some, or High Risk exposures listed above.
