

SBM Weekly Indicators: Layout for State's Data Submission

This document is the submission format for states with state based marketplaces to submit data to the federal government. This format does not require the submission of individual-level, granular data. The data will be used to assess the Marketplace progress in operational performance, QHP plan premiums and subsidies, and enrollment/eligibility activity for initial years of operations.

QHP Data in this layout are specific to medical QHPs and stand-alone dental plans (not vision) and coverage offered through the marketplaces (not Medicaid or CHIP coverage).

If no data match the restrictions of a particular data element, enter "-777". If the data are believed to be reportable in the future, but are not reportable at the time that the data are submitted, enter "-888" to indicate the data are not available. If it is not possible to report a data element because of the way the marketplace is operated, enter "-999" to indicate the data elements are not applicable.

Reporting Schedule: Weekly during Open Enrollment; aggregated to 4 weeks of data during other parts of the year. For each report, states should report cumulative data from the start of Open Enrollment (November 15, 2014). The first scheduled reporting due date is November 25, 2014.

Questions should be directed to Nick Sukachevin at Nickom.Sukachevin@cms.hhs.gov or Carly Rhyne at Carly.Rhyne@cms.hhs.gov

Glossary of Data Elements for Weekly and Other Marketplace Metrics Reported by States

Category	Measure/Indicator	Definition / Clarification
Data Coding	Applies to any numeric indicator	If no data match the restrictions of a particular data element, enter "-777". If the data are believed to be reportable in the future, but are not reportable at the time that the data are submitted, enter "-888" to indicate the data are not available. If it is not possible to report a data element because of the way the marketplace is operated, enter "-999" to indicate the data elements are not applicable.
Initial Applications-- Application level Individual Market Only	Initiated Electronic Applications	An initiated application submitted via electronic channels includes applications where data is provided through the web portal by the applicant or inputted into the system electronically by call center staff or other assisters. The applicant must have a registered account, started the application, and provided enough information to hit "save."

FPL	<p>FPL (Federal Poverty Level) is calculated based on the projected, total, annual modified adjusted gross income (MAGI) for the taxpayer's family. FPL is based on the same MAGI as the SBM uses to determine eligibility of APTC.</p> <ul style="list-style-type: none"> - MAGI includes the sum of the income of the taxpayer and the lawfully present individuals for whom the taxpayer properly claims a deduction for personal exemption for the taxable year. For additional information see Health Insurance Premium Tax - To report FPL, MAGI should be compared to the HHS poverty guidelines (current levels found here http://aspe.hhs.gov/poverty/13poverty.cfm), which is adjusted for the size of the family and state of residence. - For the purposes of the SBM Supplemental Data Submission, MAGI may or may not be verified. States should report FPL based on incomes as of the most recent eligibility determination. - For individuals that do not request an eligibility determination for financial assistance, MAGI may not be available. If MAGI is unavailable, populate the cell for the number of people with unknown FPL and enter -888 for each FPL category to signal data unavailable. Entering zero would signify no individuals at that income level. <p>The breakouts of FPL based on annual household income are:</p>
