Farm Labor

Released May 22, 2014, by the National Agricultural Statistics Service (NASS), Agricultural Statistics Board, United States Department of Agriculture (USDA).

April Hired Workers Down 7 Percent, Wage Rates Increase 1 Percent From Previous Year

There were 688,000 workers hired directly by farm operators on the Nation's farms and ranches during the week of April 6-12, 2014, down 7 percent from the April 2013 reference week. Workers hired directly by farm operators numbered 540,000 during the week of January 12-18, 2014, down 9 percent from the January 2013 reference week.

Farm operators paid their hired workers an average wage of \$12.00 per hour during the April 2014 reference week, up 1 percent from the April 2013 reference week. Field workers received an average of \$11.01 per hour, an increase of 1 percent. Livestock workers earned \$11.35 per hour, down 10 cents. The field and livestock worker combined wage rate, at \$11.11 per hour, was up 4 cents from the 2013 reference week. Hired laborers worked an average of 40.2 hours during the April 2014 reference week, compared with 40.5 hours worked during the April 2013 reference week.

Farm operators paid their hired workers an average wage of \$12.23 per hour during the January 2014 reference week, up 2 percent from the January 2013 reference week. Field workers received an average of \$11.10 per hour, up 2 percent, while livestock workers earned \$11.36 per hour compared with \$11.39 a year earlier. The field and livestock worker combined wage rate, at \$11.20 per hour, was up 13 cents from the January 2013 reference week. Hired laborers worked an average of 38.9 hours during the January 2014 reference week, compared with 38.7 hours worked during the January 2013 reference week.

April Reference Week

For the April 2014 reference week, the largest percentage increases in the number of hired workers from the 2013 reference week occurred in the Hawaii, Delta (Arkansas, Louisiana, and Mississippi) and Mountain I (Idaho, Montana, and Wyoming) regions. The Delta region saw the largest increase, with 40 percent more workers on the region's farms.

The largest percentage decreases in the number of hired workers from the 2013 reference week occurred in the Cornbelt II (Iowa and Missouri), Mountain III (Arizona and New Mexico) and Pacific (Oregon and Washington) regions. The Mountain III region saw the biggest decline, with workers down more than one-third from the 2013 reference week.

The largest percentage increases in average wage rates for all hired workers occurred in the Hawaii, Appalachian I (North Carolina and Virginia), Cornbelt II and Mountain III regions.

January Reference Week

For the January 2014 reference week, the largest percentage increases in the number of hired workers from the January 2013 reference week occurred in the Florida, Hawaii, and Delta (Arkansas, Louisiana, and Mississippi) regions. The Delta region saw the largest increase, with 47 percent more workers on the region's farms.

The largest percentage decreases in the number of hired workers from the 2013 reference week occurred in the Appalachian II (Kentucky, Tennessee, and West Virginia), Cornbelt II (Iowa and Missouri), and Mountain II (Colorado, Nevada, and Utah) regions. The Cornbelt II region saw the biggest decline, employing less than half of the region's 2013 workforce.

The largest percentage increases in average wage rates for all hired workers occurred in the Hawaii, Appalachian I (North Carolina and Virginia), Cornbelt II, Mountain I (Idaho, Montana, and Wyoming), and Mountain III (Arizona and New Mexico) regions. The Cornbelt II region saw the most substantial rise in average wages for all hired workers, with a 16 percent increase from the January 2013 reference week.

Farm Labor Definitions

The following definitions are provided to assist in interpreting statistics published in Farm Labor reports. To ensure consistency in data collection, the questionnaires and instruction manual used by the interviewers provide more in-depth explanations of these terms.

Farm or Ranch: A place that sells, or would normally sell, at least \$1,000 worth of agricultural products during the year.

Agricultural Work: Work done on a farm or ranch in connection with the production of agricultural products, including nursery and greenhouse products and animal specialties such as fur farms or apiaries. Also included is work done off the farm to handle farm related business, such as trips to buy feed or deliver products to local market.

Hired Worker: Anyone, other than an agricultural service worker, who was paid for at least one hour of agricultural work on a farm or ranch. Worker type is determined by what the employee was primarily hired to do, not necessarily what work was done during the survey week. Types of workers include:

Field Workers: Employees engaged in planting, tending and harvesting crops including operation of farm machinery on crop farms. The Standard Occupation Classification (SOC) codes and titles associated with field workers are 45-2041: graders and sorters of crop, nursery and greenhouse products; 45-2091: agricultural equipment operators on crop, nursery and greenhouse operations; 45-2092: farm workers and laborers on crop, nursery and greenhouse operations; 53-7064: packers and packagers, hand on crop, nursery and greenhouse operations.

Livestock Workers: Employees tending livestock, milking cows or caring for poultry,

including operation of farm machinery on livestock or poultry operations. SOC codes and titles associated with livestock workers are 45-2041: graders and sorters, farm, ranch and aquacultural animal products; 45-2093: farm workers, farms, ranch and aquacultural animal products; 45-2099: all other workers, farms, ranch and aquacultural animal products; 53-7064: packers and packagers, hand, farms, ranch and aquacultural animal products.

Supervisors: Hired managers, range foremen, crew leaders, etc. SOC codes and titles associated with supervisors 11-9013: farmers, ranchers, and other agricultural managers; 45-1011: first-line supervisors of farming and fishing workers.

Other Workers: Employees engaged in agricultural work not included in the other three categories. Bookkeepers and pilots are examples. SOC codes and titles associated with other workers include but are not limited to 45-2011: agricultural inspectors; 45-2021: animal breeders; 37-2012: pesticide handlers, sprayers, and applicators, vegetation.

For more information on the applicable Standard Occupational Classification codes, see "Crosswalk from National Agricultural Statistics Service Farm Labor Survey to the 2010 Standard Occupational Classification" at the "Surveys and Programs" page for Farm Labor, on the NASS website (http://www.nass.usda.gov).

Methods of Pay: All wage rates are calculated based on total wages paid and total hours worked during the survey reference week. Wages paid other than hourly (bi-weekly, monthly, etc.) are converted to an hourly basis prior to summarization. Wages paid by piece rate (per quantity of produce picked, etc.) are also converted to an hourly basis.

Perquisites: Benefits, such as cash bonuses, housing, or meals, provided to an employee in addition to pay are included in perquisites. Wage rates published in this release do not include the value of these benefits.

Term of Employment: The length of time during the year the farm operator expects to employ those workers who were on the payroll during the survey week.

Agricultural Service: Any farm-related service performed on a farm or ranch on a contract or fee basis. This primarily includes activities performed by contract workers on fruit, vegetable, or berry operations. It also includes custom work,

veterinarian work, artificial insemination, sheep shearing, milk testing, or any other farm-related activity performed on a farm or ranch on a "fee per service" basis. The agricultural services component has been discontinued from the Farm Labor Survey.

Contract Labor: Contract workers are paid by a crew leader, contractor, buyer, processor, cooperative, or other person who has an oral or written agreement with a farmer/rancher. Pruning, thinning, weeding or harvesting of fruit, vegetable or berry crops are examples. A machine is not a part of the service activity provided by the contractor. The Farm Labor Survey excludes measures of contract labor.

Custom Work: Work performed by machines and labor hired as a unit. Hay baling, combining, corn or cotton picking, spraying, fertilizing, and laser leveling are examples of custom work when the equipment is included in the service activity. The Farm Labor Survey excludes measures of custom labor.

Type of Farm (or Ranch): An operation is classified in the farm type which accounts for the largest portion of the total gross value of sales for its agricultural production.

Types of farms broken out in this publication are:

Field Crops: A farm producing wheat, rice, corn, soybeans, barley, dry beans, rye, sorghum, cotton, popcorn, tobacco, or other such crops.

Other Crops: A farm producing vegetables, melons, berry crops, grapes, tree nuts, citrus fruits, deciduous tree fruits, avocados, dates, figs, olives, nursery, or greenhouse crops. This category also includes farms producing potatoes, sugar crops, hay, peanuts, hops, mint, and maple syrup.

Livestock or Poultry: A farm producing cattle, hogs, sheep, goats, milk, chickens, eggs, turkeys, or animal specialties such as furs, fish, honey, etc.

Gross Value of Sales: This includes all income during a year from the sale of crops, livestock, dairy, poultry, or other related agricultural products, including the landlord's share and the value of products produced under contract. When commodities are placed under CCC loan, they are considered sold.

Survey Methodology

Survey Procedures: The NASS Farm Labor Survey is conducted semi-annually in April and October, in all surveyed states except California. During the April data collection, data for both January and April reference weeks are collected. During the October data collection, data for both July and October reference weeks are collected. The quarterly reference week is the Sunday to Saturday period which includes the 12th day of the month. For California, collection of these data is currently conducted on a quarterly basis, as part of the California Employment Development Department monthly labor program.

The target population for the Farm Labor Survey program is all farms and ranches with \$1,000 or more in agricultural sales (or potential sales). An optimal sample is selected in each state with a U.S. sample size of about 12,000.

The Farm Labor Survey is a multiple frame survey, incorporating samples from both the NASS list and area frames to ensure adequate coverage.

Farms on the list frame are sampled through a hierarchical stratified design, with strata based on measures of size. Those operations with associated control data indicating peak numbers of workers are stratified based on these values, and those expected to employ large numbers of workers (higher peak number values) are selected with the greatest frequency. Farms on the list frame which do not have peak worker control data are stratified and sampled based on gross value of sales. Farms stratified by gross value of sales are selected at a lower frequency.

In order to provide coverage of farms not currently part of the NASS list frame, a second sample is drawn consisting of segments of land selected from the NASS area frame. The area frame contains all land in the state and, as such, is complete. The land is stratified according to intensity of agriculture using satellite imagery. The land in each stratum is divided into segments of roughly one square mile. Segments are optimally allocated and sampled to effectively measure crops and livestock. The sampled segments are fully enumerated in June. All farms and ranches found operating tracts in these segments are checked to see if they are included in the list frame hired labor population. The farms and ranches that are not included in the list frame labor population, called nonoverlap tracts, are sampled for the Farm Labor Survey so that the target population is completely represented. The area frame component is enumerated during each semi-annual data collection period along with the list sample.

Most respondents are first contacted through self-administered mailed questionnaires, which can be completed either by hand or securely online. All manually completed survey questionnaires are returned to the NASS National Operations Center, where they are visually reviewed and key entered. Nonresponse follow-up is completed either by computer-assisted telephone interviews conducted from NASS Data Collection Centers, or in person by an enumerator.

Throughout the data collection process, steps are taken to minimize the impact of nonsampling errors such as reporting, recording, and editing errors. These steps include questionnaire testing, comprehensive interviewer training, validation, and verification of processing systems, application of detailed computer edits, and evaluation of the data via the analysis tools.

Nonresponse adjustment is necessary to account for producers who refuse to participate in the survey, cannot be located during the data collection period, or who submit incomplete reports. These nonrespondents must be accounted for if accurate estimates of farm labor are to be made. For the Farm Labor Survey, nonrespondents are accounted for by adjusting the weights of the respondents. The adjustment occurs by stratum as all strata represent homogeneous groupings of similar sized farms. The adjustment is performed by individual item on the questionnaire so adjustments for item nonresponse (partial reports) and unit nonresponse (refusals and inaccessibles) are done in a single calculation.

For estimation of data items, point estimates called direct expansions are calculated by multiplying the reported value by the final adjusted weight (initial sampling weight adjusted for nonresponse) and summing to a stratum total. A variance estimate is also computed at the stratum level. The nonoverlap tracts are treated as an additional stratum. Totals and variances are additive across strata to form state level point estimates.

Ratio estimates are also computed for many items. For example, wage rates are calculated as the ratio of total wages to total hours worked. Ratio estimates use the reweighted estimator described above for the numerator and denominator direct expansions. Both the numerator and denominator must be usable in order for that record to be used in the ratio estimator.

The number of hired workers, average hours worked, average wage rate data, and all associated sub-items are summarized from the dataset. Because an identical data collection instrument (questionnaire) and follow-up interview are used for all states, as well as identical editing, analysis, and summarization processes, state data can be summarized and regional and national survey point estimates computed. For estimation purposes, point estimates are adopted as survey indications for all data items. The summary results provide multiple direct and ratio indications for each data series being estimated. The results also provide information used to assess the performance of the current survey and evaluate the quality of the survey indications. NASS Regional Field Offices interpret the survey indications and submit state level recommendations for all member states to NASS headquarters, providing justification in cases where recommendations deviate from summary indications, as well other state specific comments and justifications. NASS headquarters completes the regional and JU.S. level summaries, which utilize the same estimators and produce the same indications as the state level summaries.

For the final step in the estimation process, NASS assembles a panel of statisticians to serve as the Agricultural Statistics Board (ASB) for the Farm Labor Survey. The Farm Labor ASB reviews the U.S. level, regional, and state level survey indications and establishes all final, official estimates for the Farm Labor Survey program. Since larger sample sizes yield more precise results, the ASB employs the "top-down" approach by determining the U.S. level estimates first and reconciling the state recommendations to the U.S. and regional numbers for all estimates including number of hired workers, average hours worked, average wage rates, and associated sub-items. As part of the semi-annual process, the ASB also considers revised recommendations and issues revisions of previously published estimates where appropriate. Additionally, the ASB reviews the annual average estimates for the November publication, which are summarized from the final regional and U.S. level estimates for each of the four quarters. Through examining indications across states and regions, re-examining outliers, and considering state level recommendations and comments, the ASB is able to establish all final estimates according to both local conditions and regional and national conditions and trends.

Revision Policy: Farm labor statistics are subject to revision semi-annually and annually. Revisions must be supported by additional data that directly affect the level of the estimate. Worker numbers and wage rates for January and April 2013, and October 2013 were subject to revision with this report.

For More Information

For more information on the Farm Labor Survey methodology and quality measures, see "Farm Labor Survey Methodology and Quality Measures" on the NASS website (http://www.nass.usda.gov).

Information Contacts

Listed below are the commodity statisticians in the Environmental, Economics, and Demographics Branch of the National Agricultural Statistics Service to contact for additional information. E-mail inquiries may be sent to nass@nass.usda.gov.

Tony Dorn, Head, Economics Section	
Rachel Antzak – Cash Receipts, Land Values	
Daryl Brinkman – Prices Received, Prices Received Indexes	
Tynesha Boomer – ARMS	
Kuan Chen – Prices, Prices Research	
Chris Dickerson – Prices Received, Prices Received Indexes	
Mark Gorsak – Prices, Prices Research	
Judy McDermott – Prices Paid, Prices Paid Indexes	
Michael Mathison – ARMS	
Joe Hagedorn – Cash Rents, Grazing Fees	
Scott Shimmin, Head, Environmental and Demographics Section	
Liana Cuffman – Chemical Use, American Indians, Census	
Doug Farmer – Census	
Steve Peterson – Farms, Land in Farms, Census	
Jackie Ross – Census	
Theresa Varner – Farm Labor, Chemical Use	

Access to NASS Reports

For your convenience, you may access NASS reports and products the following ways:

- > All reports are available electronically, at no cost, on the NASS web site: <u>http://www.nass.usda.gov</u>
- Both national and state specific reports are available via a free e-mail subscription. To set-up this free subscription, visit <u>http://www.nass.usda.gov</u> and in the "Follow NASS" box under "Receive reports by Email," click on "National" or "State" to select the reports you would like to receive.

For more information on NASS surveys and reports, call the NASS Agricultural Statistics Hotline at (800) 727-9540, 7:30 a.m. to 4:00 p.m. ET, or e-mail: nass@nass.usda.gov.

The U.S. Department of Agriculture (USDA) prohibits discrimination against its customers, employees, and applicants for employment on the bases of race, color, national origin, age, disability, sex, gender identity, religion, reprisal, and where applicable, political beliefs, marital status, familial or parental status, sexual orientation, or all or part of an individual's income is derived from any public assistance program, or protected genetic information in employment or in any program or activity conducted or funded by the Department. (Not all prohibited bases will apply to all programs and/or employment activities.)

If you wish to file a Civil Rights program complaint of discrimination, complete the <u>USDA Program Discrimination</u> <u>Complaint Form</u> (PDF), found online at <u>http://www.ascr.usda.gov/complaint_filing_cust.html</u>, or at any USDA office, or call (866) 632-9992 to request the form. You may also write a letter containing all of the information requested in the form. Send your completed complaint form or letter to us by mail at U.S. Department of Agriculture, Director, Office of Adjudication, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410, by fax (202) 690-7442 or email at program.intake@usda.gov.
