Change Request (83-C)

December 15, 2014

The Food and Drug Administration is submitting this nonmaterial/non-substantive change request (83-C) to add 2,724 burden hours and 9,280 annual responses.

This generic clearance was originally thought to include projects originating in only the Center for Biological Evaluation and Research but because various programs within FDA deal with biological products we experienced more use of this generic approval than anticipated and, therefore, require an increase in hours until the expiration date in 2017.
