**Subject:** Fwd:public comment on federal register special people get this govt tax dolalrs - most get nothing in usa - shut down program only for specials

why would there be a cutoff in age to 60s when women in america are living to 80s and 90s. dont they have a right to health too?

also i note that there are 50 states in the union and you are asking 50 stats to pay for just 22. what is the fairness in that. that is completely unqual treatment. i believe this program should be shut down. i see no reason that federal govt taxes 50 states to provide benefits to only 22 states. this unequal treatment is rampant in the federal govt and it defies the us. constitution. all women deserve to be protected, not just for some "special" women that the cdc wants to coddle. this comment is for the public record. please receipt. jean public [jeanpublic1@yahoo.com](mailto:jeanpublic1@yahoo.com)
