**NACCHO**

National Association of County & City Health Officials

Form Approved
OMB No. 0920-0879
Expiration Date 03/31/2018**Preexposure Prophylaxis (PrEP): Local health Department Assessment Instrument**

The National Association of County and City Health Officials (NACCHO), with funding and support from the Centers for Disease Control and Prevention (CDC), is conducting this assessment to establish a better understanding of local health department's (LHD's) HIV pre-exposure prophylaxis (PrEP) perceived role in implementation activities, needs, challenges, opportunities, and next steps. This information will allow NACCHO, as well as its governmental and nongovernmental partners at the national, state, and local level, to better support and promote LHD engagement in PrEP implementation.

The assessment should take approximately 30 minutes to complete. Once you begin the assessment, you will be able to save and continue at a later time. To preview the assessment, you can access a PDF version of the questions. Please consult with other staff members informed about your health department's PrEP activities, as needed, to complete the assessment.

Thank you in advance for your time and attention to this assessment. If you have any questions, please contact Gretchen Weiss, Senior Program Analyst for HIV/STI/HCV at gweiss@naccho.org or 202-507-4276.

Public reporting burden of this collection of information is estimated to average 30 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid Office of Management and Budget control number. Send comments regarding this burden estimate, or any other aspect of this information collection, including suggestions for reducing this burden to CDC/Agency for Toxic Substance and Disease Registry Information Collection Review Office, 1600 Clifton Road NE, MS D-74, Atlanta, Georgia 30333; Attention: PRA (0920-0879).

By clicking the Begin button, you are providing your consent to voluntarily participate in this activity.

- Develop educational materials about PrEP
- Communications activities related to PrEP
- Expand healthcare provider education efforts
- Develop and deliver HIV risk-reduction counseling and behavioral interventions for persons taking PrEP
- Evaluation activities for PrEP-related activities
- Program staff to conduct non-clinical PrEP-related activities (e.g., assessment of eligibility for insurance, navigation or linkage to providers)
- Personnel (e.g., healthcare providers) to prescribe PrEP and care for patients on PrEP
- Other (please specify):

What type of assistance or support would be most helpful for advancing your health department's engagement in PrEP?

(Select up to three)

- In-person learning and training events
- Web-based learning and training events
- Direct technical or capacity building assistance
- A community of practice, peer network, or other forum for health departments to discuss PrEP
- Visiting a health department implementing PrEP
- Other (please specify):

What PrEP-related topics would you need to know more about?

(Select up to three)

- Identifying populations that might benefit from PrEP
- Identifying individuals that might benefit from PrEP
- Educating community members about PrEP
- Educating healthcare providers about PrEP
- Identifying healthcare providers prescribing or willing to prescribe PrEP
- Medical costs and payment options for individuals on PrEP
- Establishing a protocol for referral to a PrEP provider/program from a health department clinic
- Monitoring and evaluating the uptake and impact of PrEP
- Improving testing and prevention services for MSM
