Screen 1

The screenshot shows a web browser window with the address bar containing the URL: <https://www.oids1.cdc.gov/mrIWeb/mrIWeb.dll?I.Project=M>. The browser's menu bar includes File, Edit, View, Favorites, Tools, and Help. Below the browser window is the CDC logo and the text "Department of Health and Human Services Centers for Disease Control and Prevention".

Form Approved
OMB Control No.: 0920-0879
Expiration Date: March 31, 2018

Mass Gathering Outbreak Information Collection Form

In collaboration with the Council of State and Territorial Epidemiologists (CSTE) and the National Association of County and City Health Officials (NACCHO), the U.S. Centers for Disease Control and Prevention (CDC) is conducting an assessment of mass gathering-related respiratory disease outbreaks reported in your jurisdiction from January 2009 through December 2014.

For the purpose of this assessment, a mass gathering is considered the congregation (planned or unplanned) of 1000 or more persons in either an indoor or outdoor venue for a common purpose (e.g., sporting event, conference, and state fair). An outbreak is one or more cases of a respiratory disease associated with a mass gathering (transmission linked to a point source, animal, or another person at the mass gathering). We are only interested in aggregate, de-identified information about outbreaks and the mass gatherings with which they were associated that were not previously reported to CDC's Notification of Outbreak Reporting System (NORS).

There are two parts of the collection form: 1) information on mass gathering-related respiratory disease outbreak reported in your jurisdiction, and 2) information on relevant intervention and communication strategies implemented at mass gatherings. You are able to report up to 10 mass gathering-related outbreaks. You can start and save your responses and then complete at a later time. Just remember to submit after finalizing. The assessment can be completed in 30 minutes. Neither your name nor the name of your jurisdiction will be included in any report resulting from this assessment. Data will be collected and analyzed by CDC.

CDC estimates the average public reporting burden for this collection of information as 30 minutes per response, including the time for reviewing instructions, searching existing data/information sources, gathering and maintaining the data/information needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing burden to CDC/ATSDR Information Collection Review Office, 1600 Clifton Road NE, MS D-74, Atlanta, Georgia 30333; ATTN: PRA (0920-0879).

PART I: MASS GATHERING OUTBREAK

Please provide the following information about each mass gathering-related respiratory disease outbreak reported in your jurisdiction between January 2009 and December 2014 (not previously reported to NORS). There are questions about the mass gathering characteristics and then questions on the type and size of the outbreak that occurred at that mass gathering.

Were there any mass gathering-related respiratory disease outbreaks in your jurisdiction between January 2009 and December 2014?

Yes
 No
