Form Approved
OMB No 09200920-0879
Expiration Date 04/30/2017
ECE State Indicator Report
Instructions

Welcome! Improving the health of Americans through proper nutrition, physical activity and obesity prevention is a primary goal of the CDC's Division of Nutrition Physical Activity and Obesity (DNPAO). A priority area within DNPAO is obesity prevention in the early care and education setting (ECE; e.g. child care centers and homes, Head start, pre-k).

To learn more about what states are doing related to this areas we are conducting a short assessment with:

- State Health Department ECE coordinators who support CDC's 1305 grant program and implement obesity prevention activities in the ECE setting;
- State Child and Adult Care Food Program (CACFP) Directors who support the federal CACFP program, which provides reimbursement for meals/snacks served in ECEs

Information collected through this request will be used to develop CDC's first State Indicator Report on the Early Care and Education setting (ECE SIR). The primary purpose of the ECE SIR report is to describe state level obesity prevention efforts occurring through 6 avenues that are included in DNPAO's Spectrum of Opportunities, which is CDC's framework for obesity prevention in the ECE setting. The ECE SIR will thus provide a partial snapshot describing how states have embedded obesity prevention into components of their state ECE systems or in state programs such as CACFP. Your feedback is very important to us and will be combined with other publicly available data to create the ECE SIR.

CDC's State Indicator Reports are reports produced and published by CDC and can be used by state and national government officials to describe how obesity prevention has been included in states, guide state health department obesity prevention work in the ECE setting and highlight successful state efforts.

Completing the data collection instrument is voluntary and takes approximately 5 minutes for State CACFP directors and approximately 30 minutes for state 1305 ECE respondents. CDC will not publish or share any personal identifying information about you as an individual respondent. Data will be reported at the state level and we ask that you complete this data collection instrument as it pertains to your job duties at your state agency. There are no known risks or direct benefits to you from participating or choosing not to participate, but your answers will help CDC describe how obesity prevention is being incorporated into state ECE systems to create and publish the first ECE SIR.

If you have any questions or concerns about this assessment, please contact Carrie Dooyema at cdooyema@cdc.gov.

If you agree to participate, please click next to begin. The data collection instrument does not have to be completed in one session. The data collection instrument will be open until x date. [a 3 week window TBD after OMB approval granted]

CDC estimates the average public reporting burden for this collection of information as 30 minutes per response for ECE state coordinators and 5 minutes per response for CACFP directors, including the time for reviewing instructions, searching existing data/information sources, gathering and maintaining the data/information needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing burden to CDC/ATSDR Information Collection Review Office, 1600 Clifton Road NE, MS D-74, Atlanta, Georgia 30333; ATTN: PRA (0920-0572).

Next

*** 1. In which U.S. state do you work?**

*** 2. Which best describes your job duties:**

- I am a state health department staff who is responsible obesity prevention efforts in the ECE setting
- I am a state Child and Adult Care Food Program Director who is responsible for our state's CACFP program
- I am a State Breastfeeding Coordinator or a State WIC Breastfeeding Coordinator who is responsible for breastfeeding efforts in my state

[Prev](#) [Next](#)

3. Does your state have a state-wide Quality Rating and Improvement System (QRIS) in place?

- Yes, we have a system in place
- No, we do not have a system in place
- In progress, my state is piloting or revising a system
- I don't know if we have a QRIS system

Quality Rating and Improvement Systems (QRIS)

4. Does your state's QRIS system include standards related to obesity prevention such as: nutrition, physical activity, breastfeeding or screen time?

- Yes
- No
- I don't know

Prev

Next

5. Which obesity prevention components are included in your state's QRIS standards? Please check all that apply.

- Nutrition
- Physical activity
- Breastfeeding
- Screen time
- I don't know which ones

7. In which of the following ways do state agencies (such as the Department of Health, Department of Agriculture, Department of Education, Department of Child Care) support Farm to Preschool initiatives? Please check all that apply.

- Through a statewide Farm to Preschool coalition
- By dedicating state agency staff time to Farm to Preschool activities
- By including Farm to Preschool in our state's Food Policy Council
- Through inclusion of Farm to Preschool activities in my state's nutrition/physical activity/obesity or chronic disease plan
- By state agency funding for Farm to Preschool promotion or support activities
- None of these are occurring in my state
- I do not know if any of these are occurring in my state
- Local level Farm to Preschool initiatives exist, but they are not coordinated by a state agency
- Other (please specify)

ECE State Indicator Report

Facility Level ECE Interventions

8. Does your State Health Department or another State Agency promote or provide a specific ECE obesity prevention intervention to ECE providers within your state?

Help statement: This could be an intervention such as the Nutrition And Physical Activity Assessment for Child Care (NAP SACC), a curriculum such as Color Me Healthy or a state branded program such as Minnesota's LANA (Learning About Nutrition through Activities) program.

- Yes
- No
- I don't know

[Prev](#) [Next](#)

Facility Level ECE Interventions

9. Please provide the name of the obesity prevention intervention

10. The obesity prevention intervention is: _____

- Offered to ECE providers throughout my state
- Offered to ECE providers only in a select geographic area/region of my state
- Offered only to ECE providers participating in a pilot or special program
- I don't know

11. Which benefits does your state offer to ECE providers who participate in this obesity prevention intervention?

- Financial benefits or incentives
- Technical assistance benefits such as training or consultation
- Free or low cost materials or resources
- Other benefits
- No benefits

ECE State Indicator Report

Professional Development for ECE Providers

13. Does your state have any online obesity prevention training(s) that count toward ECE providers' continuing education or professional development credits?

- Yes
- No
- I don't know

14. (Optional) Please provide any additional comments or information about ECE provider professional development in the text box below

Prev

Next

15. Does your state have a recognition or designation program for child care providers that is based on obesity prevention, such as a “Healthy Child Care” or a “Breastfeeding Friendly Child Care” program?

- Yes
- No
- I don't know

16. Is there a state level group that meets regularly that focuses on obesity prevention in the ECE setting? This could be a state level inter-agency workgroup, a state Childhood Obesity Task Force or other state level coalition that includes ECE.

- Yes
- No
- I don't know

17. For approximately how many years has your state been working in the area of obesity prevention in the ECE setting?

- 2 years or less
- 3 to 5 years
- More than 5 years

18. Does your state have a current health improvement, chronic disease or nutrition/physical activity/obesity state plan?

- Yes
- No
- I don't know

19. Is ECE included in your state's health improvement, chronic disease or nutrition/physical activity/obesity State plan?

- Yes, ECE is in our state plan
- No, ECE is not in our state plan
- I don't know if ECE is included in our state plan

ECE State Indicator Report

State CACFP Program

20. Does your state encourage ECE providers who participate in CACFP to meet specific standards that exceed federal CACFP meal pattern requirements?

For example in 2008 New York State launched the "Healthy Infant and Healthy Child Meal Patterns" initiative, which, among other things, mandates ECE providers who participate in CACFP to serve only unflavored milk for children younger than 5 years, no more than one serving of juice per day, and sweetened grain products no more than twice a week and only at snack or breakfast.

- Yes
- No

21. Does your state CACFP program promote or provide a specific ECE obesity prevention intervention to ECE providers who participate in CACFP?

- Yes
- No
- I don't know

Prev

Next

22. Which content areas are included in the obesity prevention intervention? Please check all that apply.

- Nutrition
- Physical activity
- Breastfeeding
- Screen time
- I don't know which areas are included

23. What is the name of the obesity prevention intervention?

[Prev](#) [Next](#)

24. Does your state CACFP program offer training in obesity prevention to ECE providers who participate in CACFP?

- Yes
- No
- I don't know

[Prev](#) [Next](#)

25. Which areas of obesity prevention are covered in the training? Please check all that apply.

- Nutrition
- Physical activity
- Breastfeeding
- Screen time
- I don't know which areas are included

26. How is this training provided?

- It is provided as a part of required annual CACFP training
- It is provided outside of required annual CACFP training
- Both A and B
