XDR TB Contact Investigation: A Cost Assessment

Dear colleague

Thank you for providing data needed for calculating the cost of the contact investigation that resulted from the arrival of the XDR TB patient in April 2015. We have received data from all affected sites, and would like to validate what you provided. I would like to call you to discuss any data are missing, inconsistent, or incomplete; ask about any changes that may affect projections; and discuss level of accuracy or limitations. Are you available sometime in the near future?

Best regards

Sam
