### Cancer Survivorship Needs Assessment for the National Comprehensive Cancer Control Program Grantees

#### Introduction and Informed Consent

Form Approved  
OMB No. 0920-0879  
Expiration Date 03/31/2018

This assessment is part of an information collection being conducted by Battelle on behalf of the Centers for Disease Control and Prevention (CDC), Division of Cancer Prevention and Control (DPCP). Battelle is an independent, non-profit research organization.

The purpose of the information collection is to assess the cancer survivorship needs of comprehensive cancer control (CCC) programs, and to identify the types of activities, resources, and materials that could help the CCC programs address those needs. In addition, this information collection will assess how the activities undertaken and materials produced by the National Cancer Survivorship Resource Center (NCSRC) have met the survivorship needs of CCC programs. This information collection will support DPCP's efforts to ensure that cancer survivors' public health needs are being met, and will inform future survivorship technical assistance provided to CCC programs.

The National Cancer Survivorship Resource Center (NCSRC) is a collaboration between the American Cancer Society, the George Washington University Cancer Institute, and CDC to shape the future of cancer survivorship care and improve the quality of life of cancer survivors. Starting in 2010, the current NCSRC was funded through a 5-year cooperative agreement with CDC to support the development, implementation, and evaluation of strategies outlined in the National Action Plan for Cancer Survivorship.

You have been asked to participate in this 30-minute web-based assessment because of your affiliation with a comprehensive cancer control program funded through the CDC's National Comprehensive Cancer Control Program (NCCCP).

Participation in this assessment is voluntary. You may choose not to answer particular questions, or to terminate at any time, without any penalty to you or your program. Battelle will keep your identity in this information collection private. After the assessment is completed, Battelle will deliver a data file to CDC. The data file will include your responses to the questions, plus the identity of your CCC program (e.g., an abbreviation for the state, tribal organization, territory, etc). The data file will NOT include your personal name or email address. CDC will analyze the data, prepare internal reports for program development and improvement, and may publish the results in aggregate form.

If you have any questions about the web-based assessment, please contact Battelle's coordinator, <name> at <telephone number> or <email address>. If you have any questions about your rights as a participant, please contact Battelle at 1-877-810-9530, extension 500.

If you wish to proceed, please answer the questions to the best of your ability based on your personal knowledge and experience. You do not need to complete the assessment in one sitting; your answers will not be final until you hit the "Submit" button at the end.

By clicking on the Next button you provide your consent to participate.

CDC estimates the average public reporting burden for this collection of information as 30 minutes per response, including the time for reviewing instructions, searching existing data/information sources, gathering and maintaining the data/information needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing burden to CDC/ATSDR Information Collection Review Office, 1600 Clifton Road NE, MS D-74, Atlanta, Georgia 30333; ATTN: PRA (0920-0879).

Thank you for participating in the cancer survivorship needs assessment survey. We understand your time is valuable and appreciate the information you are providing today. Your responses will help CDC better serve all who have a stake in cancer survivorship. Remember, you can leave the survey and return to your saved answers at a later time by clicking on the survey link in the invitation email message.

First, we have a few questions about you and your CCC program.

### 1. What is your position or title in your CCC program?

### 2. Please indicate the length of time you have been working with your CCC program:

- Less than 1 year
- 1-3 years
- 4-5 years
- More than 5 years

Next, we will ask some questions about awareness of the NCSRC, and how NCSRC resources are shared in your jurisdiction.

**6. In general, how familiar do you think your cancer survivorship partners are with resources on the NCSRC website?**

- Extremely familiar
- Moderately familiar
- Somewhat familiar
- Slightly familiar
- Not at all familiar
- Don't Know

**7. How familiar are you with NCSRC resources?**

- Extremely familiar
- Moderately familiar
- Somewhat familiar
- Slightly familiar
- Not at all familiar
- Don't know

**10. In what ways has CDC Comprehensive Cancer Control Branch (CCCB) provided you with information about NCSRC resources?**

**Check all that apply.**

- E-blast communications
- Program Directors Conference Call
- CCCB in-person meetings
- Program Consultant
- Other (please specify)

**11. Have you shared NCSRC resources and information with your coalition members, program partners, and other stakeholders?**

- Yes
- No
- Don't know

[Prev](#) [Next](#)

**12. How do you generally share NCSRC resources and information with your coalition members, program partners, and other stakeholders?**

**Check all that apply.**

- Links in email
- Newsletters
- CCC Program or Coalition website that links to NCSRC resources
- Listservs
- Social media
- At coalition or partner meetings
- Other (please specify)
