

Attachment K – State Level Phone Interview Reminder Phone Script

Good afternoon, my name is Jennifer Leeman and I am a professor at the University of North Carolina at Chapel Hill. We are partnering with the Centers for Disease Control and Prevention’s School Health Branch [or Division of Adolescent and School Health] on an assessment of school health tools and resources. You were recommended to us by your CDC Project Officer [name] based on the high quality of your state’s work in school health. I am calling to see if you would be willing to participate in this assessment. Your participation would involve a 50-minute phone interview to learn how you are using four school health tools and resources. We also will ask you to recommend and help us connect with two districts in your state so that we can conduct interviews with their staff. Are you willing to participate?
