Sexual Violence Prevention Strategy Description

Sexual Violence Prevention Strategy Description

Form Approved

OMB No. 0920-0879

Expiration Date 03/31/2018

Thank you for taking the time to nominate a sexual violence (SV) prevention strategy! This information collection is meant for program managers of health departments in 50 states, the District of Columbia, and four U.S. territories (awardees) and their delegates (sub-awardees) acting on behalf of those health departments in their official capacities funded through CDC's Rape Prevention and Education (RPE) Program cooperative agreement (CDC-RFA-CE14-1401).

The purpose of this collection is to obtain information about SV prevention strategies developed in practice (practice-based) that are ready for more assessment. We are especially interested in practice-based SV prevention strategies that promote protective factors and reduce risk factors at the community and societal levels of the Social Ecological Model. We are specifically looking for prevention strategies that focus on any of the following: (1) creating safe and protective environments, (2) promoting healthy social norms that protect against SV, (3) using gender equity approaches.

To nominate an SV prevention strategy, please complete the form which asks you to describe strategy goals and focus, strategy implementation, and information collection and assessment efforts. CDC may contact program staff to obtain more information, if necessary.

Your submission is important to us and will help us to identify practice-based prevention strategies that have high potential for widespread adoption, high potential for population-level impact on sexual violence outcomes, and are ready for more assessment.

Completing the Sexual Violence Prevention Strategy Description is voluntary and takes approximately 40 minutes. Your responses will be secure to safeguard against any breach of personally identifiable information. No sensitive information will be collected. You must complete the Sexual Violence Prevention Strategy Description in one sitting, as answers to questions cannot be saved.

Submission Deadline: [DATE]

If you have questions about whether strategies may be a good fit to be nominated, please send an email to dvpevaluation@cdc.gov with "SSA" starting the subject line.

To begin, please click **"Next"**. You can edit previous responses as you complete the nomination. To return to a previous page, use the **"Previous"** button at the bottom of the page (NOT the "Back" button on your browser menu). To advance, use the **"Next"** button at the bottom of the page.

Public reporting burden of this collection of information is estimated to take no more than 40 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid Office of Management and Budget control number. Send comments regarding this burden estimate, or any other aspect of this information collection, including suggestions for reducing this burden to CDC/Agency for Toxic Substance and Disease Registry Information Collection Review Office, 1600 Clifton Road NE, MS D-74, Atlanta, Georgia 30333; Attention: PRA (0920-0879).

Strategy Goals and Focus

The following questions are about focus, goals, main activities, and outcomes of the prevention strategy.

To return to a previous page, use the "Previous" button at the bottom of the page (NOT the "Back" button on your browser menu). To advance, use the "Next" button at the bottom of the page.

*** 8. Which focus area best describes the focus of the sexual violence prevention strategy being nominated? (Please check all that apply).**

- | | | |
|--|---|--|
| <input type="checkbox"/> Creating safe and protective environments | <input type="checkbox"/> Promoting healthy social norms that protect against sexual violence | <input type="checkbox"/> Using gender equity approaches |
| <input type="checkbox"/> Modify characteristics of the community (e.g., schools, neighborhoods, workplace, or institutions) rather than individuals within the community | <input type="checkbox"/> Change social norms that allow indifference to, accept, or condone violence, for example, reducing restrictive gender norms (i.e., rigid ideas about the appropriate roles and behavior of men and women) | <input type="checkbox"/> Mobilize men and boys as allies or empower girls through strengthened leadership and opportunities |
| <input type="checkbox"/> Change to institutional structures or the social and physical environment in an effort to reduce risk factors or conditions and increase protective factors that affect the entire community (e.g., improved economic security for women and girls) | <input type="checkbox"/> Provide peer leadership around preventing sexual violence and motivating individuals to promote protective norms, to help when they see behavior that puts others at risk of violence, and to take appropriate steps to safely and effectively intervene | <input type="checkbox"/> Address factors related to gender equity such as balance of power, equal pay, or positive norms about masculinity, gender, and violence among individuals |

Other (please specify)

*** 9. Which levels of the Social Ecological Model does the prevention strategy address? (Please check all that apply).**

- Individual (e.g., attitudes, beliefs, skills, and behaviors)
- Relationship (e.g., social circle peers, partners, family members)
- Community (e.g., schools, workplaces, neighborhoods)
- Societal (e.g., social and cultural norms)

Sexual Violence Prevention Strategy Description

Strategy Goals and Focus

Please describe the strategy in enough detail to explain the main components, activities, target population, and setting.

To return to a previous page, use the "Previous" button at the bottom of the page (NOT the "Back" button on your browser menu). To advance, use the "Next" button at the bottom of the page.

*** 10. What are the main components and activities of the prevention strategy?**

*** 11. Has the strategy been adapted from an existing promising or evidence-based strategy? (Adaptations include additions, deletions, and modifications to content and/or delivery methods including changes to sequence. For example: Have you borrowed materials from a promising or evidence-based strategy? Have you adapted a promising or evidence-based strategy by changing the target population?)**

- No
- Yes (If yes, please provide the name of the promising or evidence-based strategy)
