**Subject:** Fwd: public comment on federal register shut down this spending - spend tax dollars on cleaning up the poison in our food

the people of this nation say shut down this useless costly survey. the problem with our food is the witness fatcat bureaucrats at the usda and fda who routinely approve crap poison food for americans. they seem to work for the gma not for the good of the health of the American people. and you wimps never raise a stink about what goes in these corrupt agencies. you are afraid to beard fda and usda about unsafe practices. this is a totally wasteful survey. what about factory farms and the ecoli coming out of them that poison 1 out of 6 people in the usa. is that healthful food or poison food? the toxic chemicals allowed on all plants with residue galore. these profiteers are poisoning everything on earth. the usa public does not need to be gouged for this useless survey which ignores what is really going on in the food industry in America. we have a federal govt as corrupt as can be, as corrupt as sin itself. subject to bribery. this is just a wasteful attempt to try to ignore the notorious problem in American food. this comment is for the public record please receipt. jean public

Subject: shut down this spending - spend tax dollars on cleaning up the poison in our food

the federal agencies are allowing endless poisons to get through to poison people. 1 out of 6 americans die or go to hospital for food poisoning these days - the nutrition is killing us. this spending is not needed as a priority compared to stopping the poison causing colitis, and all kinds of stomach and health issues
