Oral Script to Obtain Assent from Children 5-6 (After return to school from absence)

Hi, my name is [interviewer's name]. I am doing a study of the flu with the University of Pittsburgh and Johns Hopkins University. Flu and other germs make people sick. We were told that you were absent from school because you were sick. We would like to take a swab of your nose to find out if you had the flu or were sick with another virus. If you don't want to do this, you can say no at anytime. No one will be mad at you.

The swab that we take from your nose may hurt. We will keep all the information that we collect from you private.

Do you have any questions?

Do you agree to take part in the study?
