

# UCLA Research Study

The purpose of this study is to help researchers identify developmental delays more quickly and easily.

If your child is between 33 and 39 months of age, he or she may be eligible to participate.

## Who can participate?

- Boys and girls between 33 and 39 months of age with *either*:
  - developmental delays not suspected to be an Autism Spectrum Disorder, *or*
  - symptoms consistent with Autism Spectrum Disorder including language delay, social impairment, or repetitive behaviors

## What is involved?

- 2 study visits at UCLA, both visits less than 3 hours total
- Observations of child's behavior
- Questionnaires and interview for the parent about their child's development

*Participants completing this study will receive \$50*
