

0938-1185: Justification of a Non-substantive Change

GenIC #5 - End Stage Renal Disease (ESRD) Grievant Satisfaction Survey (IC#5)

We are submitting a non-substantive change request to correct the files associated with this information collection request (ICR). Specifically, the wrong version of the generic clearance submission template was uploaded; however, OMB did review the correct version. We are simply updating the ICR in the system to match the version of the ICR that OMB reviewed and approved.
