

**SUPPORTING STATEMENT FOR  
Report of Medical Examination and Vaccination Record  
OMB Control No.: 1615-0033  
COLLECTION INSTRUMENT(S): Form I-693**

**A. Justification.**

- 1. Explain the circumstances that make the collection of information necessary. Identify any legal or administrative requirements that necessitate the collection. Attach a copy of the appropriate section of each statute and regulation mandating or authorizing the collection of information.**

Section 245 of the Immigration and Nationality Act (Act) requires that applicants for adjustment of status to that of a lawful permanent resident in the United States establish that they are admissible to the United States, as if they were first arriving. The health-related grounds of inadmissibility are found in section 212(a)(1)(A) of the Act. In addition, section 232(b) of the Act requires that medical officers of the U.S. Public Health Service (PHS) certify any physical or mental defect or disease observed in arriving aliens. When PHS medical officers are not available, U.S. Citizenship and Immigration Services (USCIS) must designate private physicians to serve as civil surgeons. Because PHS medical officers have not been available for many years, USCIS has been designating private physicians to serve as civil surgeons, in accordance with section 232(b) of the Act.

Section 212(a)(1)(A) of the Act states that the health-related grounds of inadmissibility are determined according to the regulations prescribed by the Secretary of Health and Human Services. The applicable Department of Health and Human Services (HHS) regulations are found at 42 CFR part 34. The corresponding USCIS regulations are found at 8 CFR part 232. In addition, the civil surgeons are responsible for certifying to USCIS the information necessary to determine whether applicants for adjustment of status are inadmissible on health-related grounds. The Report of Medical Examination and Vaccination Record, Form I-693 is used by the civil surgeons to report the results of the medical examination to USCIS.

- 2. Indicate how, by whom, and for what purpose the information is to be used. Except for a new collection, indicate the actual use the agency has made of the information received from the current collection.**

The information on the Report of Medical Examination and Vaccination Record, Form I-693 will be used by USCIS in considering the eligibility for adjustment of status under 8 CFR [209.1\(c\)](#), [209.2\(d\)](#), [210.2\(d\)](#), [245.5](#) and [245a.3\(d\)\(4\)](#); and V nonimmigrant status under 8 CFR [214.15\(f\)](#). The information on the Report of Medical Examination and Vaccination Record, Form I-693 will be used by EOIR in considering the eligibility for immigration benefits in removal proceedings.

The information on the Report of Medical Examination and Vaccination Record, Form I-693 may also be used by CBP in determining admissibility at a port of entry.

- 3. Describe whether, and to what extent, the collection of information involves the use of automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses, and the basis for the decision for adopting this means of collection. Also describe any consideration of using information technology to reduce burden.**

This form can be downloaded, completed and saved electronically, but cannot be e-filed at this time. This form is the most efficient means for USCIS to collect the required data until full automation can be achieved. USCIS has no estimate for when electronic submission of the Report of Medical Examination and Vaccination Record may be possible. USCIS provides this application to the public via the USCIS Internet Web site at [www.uscis.gov/i-693](http://www.uscis.gov/i-693). This information collection is partially compliant with the Government Paperwork Elimination Act by allowing for accessing, completing and saving the form electronically.

- 4. Describe efforts to identify duplication. Show specifically why any similar information already available cannot be used or modified for use for the purposes described in Item 2 above.**

No other similar information is currently available which can be used for this purpose. In addition, USCIS has examined whether the information is collected by other DHS components or Federal agencies from which USCIS could obtain the information, and no viable source was found. The law and regulations require a separate and distinct medical examination and a report to be completed in association with the application for adjustment of status. An examination and medical report prepared for other purposes is not sufficient for USCIS's needs in adjudicating applications. This is because routine physical examinations, or other medical examinations not performed specifically for immigration purposes, do not typically cover all of the health conditions required to determine admissibility. Further, the assessment of health conditions for immigration purposes must be conducted in accordance with HHS regulations, as stated above, including the *Technical Instructions for the Medical Examination of Aliens in the United States (Technical Instructions)*.<sup>1</sup> The Report of Medical Examination and Vaccination Record, Form I-693 covers all health conditions relevant to the admissibility determination and corresponds with the *Technical Instructions* to ensure that the specific health conditions that may impact admissibility are properly assessed in the medical examination.

---

<sup>1</sup> Provided by the Centers for Disease Control and Prevention, a component agency of HHS. The *Technical Instructions* are available online at: <http://www.cdc.gov/immigrantrefugeehealth/exams/ti/civil/technical-instructions-civil-surgeons.html>.

**5. If the collection of information impacts small businesses or other small entities (Item 5 of OMB Form 83-I), describe any methods used to minimize burden.**

This collection of information does not have an impact on small businesses or other small entities. This form is completed by applicants required to establish that they are not inadmissible to the United States based on health-related grounds. While the applicants may engage the services of a doctor, those activities are a normal part of the doctor/small business function. No unnecessary burden is placed upon the applicant or doctor due to the information collected on this form.

Under [5 CFR 1320.3\(b\)\(1\)](#), burden means the total time, effort, or financial resources expended by persons to maintain, retain, or disclose or provide information to or for a Federal Agency. Under [5 CFR 1320.3\(c\)\(4\)](#), for purposes of the definition of ten or more persons, contractors engaged by a respondent for the purpose of complying with the collection of information are not included as persons. Medical professional providing medical certifications are generally paid for their services either by the alien or a third party, and thus are considered contractors engaged by the respondents to comply with this information collection, and do not fall under the category of persons with the associated burden as described above.

**6. Describe the consequence to Federal program or policy activities if the collection is not conducted or is conducted less frequently, as well as any technical or legal obstacles to reducing burden.**

If the required information is not collected, USCIS will not be able to correctly determine the eligibility of an applicant for lawful permanent resident status, creating a potential public health risk or denying the applicant an immigration benefit to which he or she may be legally entitled.

**7. Explain any special circumstances that would cause an information collection to be conducted in a manner: requiring respondents to report information to the agency more often than quarterly; requiring respondents to prepare a written response to a collection of information in fewer than 30 days after receipt of it; requiring respondents to submit more than an original and two copies of any document; requiring respondents to retain records, other than health, medical, government contract, grant-in-aid, or tax records for more than three years; in connection with a statistical survey that is not designed to produce valid and reliable results that can be generalized to the universe of study; requiring the use of a statistical data classification that has not been reviewed and approved by OMB; that includes a pledge of confidentiality that is not supported by authority established in statute or regulation, that is not supported by disclosure and data security policies that are consistent**

**with the pledge, or which unnecessarily impedes sharing of data with other agencies for compatible confidential use; or requiring respondents to submit proprietary trade secret, or other confidential information unless the agency can demonstrate that it has instituted procedures to protect the information's confidentiality to the extent permitted by law.**

There are no special circumstances associated with this information collection.

- 8. If applicable, provide a copy and identify the data and page number of publication in the Federal Register of the agency's notice, required by 5 CFR 1320.8(d), soliciting comments on the information collection prior to submission to OMB. Summarize public comments received in response to that notice and describe actions taken by the agency in response to these comments. Specifically address comments received on cost and hour burden. Describe efforts to consult with persons outside the agency to obtain their views on the availability of data, frequency of collection, the clarity of instructions and recordkeeping, disclosure, or reporting format (if any), and on the data elements to be recorded, disclosed, or reported. Consultation with representatives of those from whom information is to be obtained or those who must compile records should occur at least once every 3 years – even if the collection of information activity is the same as in prior periods. There may be circumstances that may preclude consultation in a specific situation. These circumstances should be explained.**

On September 22, 2014, USCIS published a 60-day notice in the Federal Register at 79 FR 56595. USCIS received/did not receive public comments in response to the 60-day notice.

The commenter suggested that anyone seeking citizenship who is sick should be denied entry into the United States. The commenter indicated that American citizens are paying the bills for everyone else in the world and should instead look out for their fellow citizens first. The commenter also suggested that there should be a moratorium period on further immigration into the United States.

USCIS did not make any changes based on this comment. Congress sets the requirements for immigration into this country through the Immigration and Nationality Act, including the health-related of inadmissibility and the medical examination requirement. USCIS determines the requirements of the health-related grounds of inadmissibility based on regulations enacted by the Department of Health and Human Services (HHS), through the Centers for Disease Control (CDC). The Form I-693 functions to report the results of the medical examination and allows applicants to establish that they are not inadmissible based on health-related grounds. Through revision of the Form I-693, USCIS is ensuring that the form efficiently asks the necessary questions for the health-related grounds of inadmissibility, as set by Congress and the Department of Health and Human Services.

On December 16, 2014, USCIS published a 30-day notice in the Federal Register at 79 FR 74761. USCIS has not received any comments in response to this notice to date.

**9. Explain any decision to provide any payment or gift to respondents, other than remuneration of contractors or grantees.**

USCIS does not provide payments or gifts to respondents in exchange for a benefit sought.

**10. Describe any assurance of confidentiality provided to respondents and the basis for the assurance in statute, regulation, or agency policy.**

There is no assurance of confidentiality. The system of record notice associated with this information collection is the [DHS/USCIS/ICE/CBP-001 – Alien File, Index, and National File Tracking System of Records, November 21, 2013, 78 FR 69864](#). This information collection does not require a privacy impact assessment coverage under the E-Government Act because the information collected is not maintained by an information technology system.

**11. Provide additional justification for any questions of a sensitive nature, such as sexual behavior and attitudes, religious beliefs, and other matters that are commonly considered private. This justification should include the reasons why the agency considers the questions necessary, the specific uses to be made of the information, the explanation to be given to person’s from whom the information is requested, and any steps to be taken to obtain their consent.**

Some of the information requested on this form is of a sensitive nature. The form includes information as to whether an applicant has been diagnosed with tuberculosis, syphilis, or other communicable diseases or suffers from a physical or mental disorder, drug abuse or addiction. These questions are required to obtain information that must be reviewed to determine whether an applicant has or does not have a condition that may make him or her ineligible for adjustment of status on public health-related grounds under 8 CFR [209.1\(c\)](#), [209.2\(d\)](#), [210.2\(d\)](#), [245.5](#) and [245a.3\(d\)\(4\)](#); and V nonimmigrant status under 8 CFR [214.15\(f\)](#).

**12. Provide estimates of the hour burden of the collection of information.**

Type of Respondent	Form Name (Form Number)	No. of Respondents	No. of Responses per Respondent	Avg. Burden per Response (in hours)	Total Annual Burden (in hours)	Avg. Hourly Wage Rate	Total Annual Respondent Cost
--------------------	-------------------------	--------------------	---------------------------------	-------------------------------------	--------------------------------	-----------------------	------------------------------

Individuals or households	Report of Medical Examination and Vaccination Record (Form I-693)	620,244	1	2.5	1,550,610	* \$31.26	\$48,472,069
Total		<b>620,244</b>			<b>1,550,610</b>		<b>\$48,472,069</b>

\* The above Average Hourly Wage Rate is the [May 2013 Bureau of Labor Statistics](#) average wage for “All Occupations” of \$22.33 times the wage rate benefit multiplier of 1.4 (to account for fringe benefits) equaling \$31.26.<sup>2</sup> The selection of “All Occupations” (for example) was chosen as the expected respondents for this collection could be expected to be from any occupation.

**Annual Reporting Burden**

The annual reporting burden is **1,550,610**. This figure was derived by multiplying the estimated number of respondents (620,244) x (1) frequency of response x (2.5) 2 ½ hours per response.

This estimated time burden is based on USCIS experience with the program and is calculated as follows: learning about the form (30 minutes); making an appointment with a civil surgeon for a medical exam (15 minutes); taking the medical exam (1 hour); reading the results of the Tuberculin Skin Test (TST) or Interferon Gamma Release Assay (IGRA), which requires a second appointment with the civil surgeon (30 minutes); reporting the results of the medical exam on the form (10 minutes); and submitting the medical exam report to USCIS (5 minutes).

**13. Provide an estimate of the total annual cost burden to respondents or record keepers resulting from the collection of information. (Do not include the cost of any hour burden shown in Items 12 and 14).**

There are no capital or start-up costs associated with this information collection. *(There is no fee associated with this information collection.)*

This information collection may impose some out-of-pocket costs on respondents in addition to the time burden provided under item 12 above. Respondents may incur costs to obtain medical examinations. USCIS estimates the average cost of the medical examinations may vary widely, from as little as \$20 to \$1000 per respondent (from vaccinations to additional medical evaluations and testing that may be required based on the health conditions of the applicant). USCIS estimates that the average cost for these activities is \$490 and that all respondents

<sup>2</sup> The wage rate used is for the applicant for adjustment of status who is subject to this information collection. The civil surgeons are paid for their services and thus their time and other associated burden are not subject to the Paperwork Reduction Act.

may incur this cost. The total cost to respondents would be estimated as follows: 620,244 (number of respondents) x average cost per response of \$490 = **\$303,919,560.**

- 14. Provide estimates of annualized cost to the Federal government. Also, provide a description of the method used to estimate cost, which should include quantification of hours, operational expenses (such as equipment, overhead, printing, and support staff), and any other expense that would not have been incurred without this collection of information. Agencies also may aggregate cost estimates from Items 12, 13, and 14 in a single table.**

Annualized Cost Analysis:

a.	Printing Cost	\$	9,143
b.	Collection and Processing Cost	\$	39,075,372
c.	Total Annual Cost to the Government	\$	39,084,515

**Government Cost**

The estimated cost to USCIS, which is covered by fee receipts, is **\$39,084,515.** This figure is calculated by using the estimated number of respondents 620,244 x (1) number of response x (1.5 hours) per response (time required to collect and process information) x \$42 (suggested average hourly rate for clerical, officer, and supervisory time with benefits). In addition, this figure includes the estimated overhead cost for printing, stocking, and distributing the form, which is 9,143.

- 15. Explain the reasons for any program changes or adjustments reporting in Items 13 or 14 of the OMB Form 83-I.**

<b>Data collection Activity/ Instrument</b>	<b>Program Change (hours currently on OMB Inventory)</b>	<b>Program Change (New)</b>	<b>Difference</b>	<b>Adjustment (hours currently on OMB Inventory)</b>	<b>Adjustment (New)</b>	<b>Difference</b>
<b>Form I-693</b>				1,412,950	1,550,610	137,660
<b>Total(s)</b>				<b>1,412,950</b>	<b>1,550,610</b>	<b>137,660</b>

There has been an increase of 137,660 hours in the total estimated annual burden hours previously reported for this information collection, from 1,412,950 to 1,550,610. This increase can be attributed to the increase in the number of respondents from 565,180 respondents to 620,244. The increase in the number of respondents is based on updated FY13-15 statistical data and the resulting adjustment in agency estimates.

USCIS is revising the Report of Medical Examination and Vaccination Record, Form I-693 (see table of changes), but does not estimate that the revisions will

result in a change to the estimated time burden as they relate to updates and clarifications. The revisions include the following:

- Updating language on form and instructions to incorporate military physicians (new blanket designation category since the last form revision).
- Updating language to be consistent with the new Diagnostic and Statistical Manual of Mental Disorders (DSM-5).
- Updating language on page 1 of form instructions clarifying confidentiality of medical exam report (language taken from [USCIS Policy Manual Volume 8, Part B](#)).
- Adding language defining Class A and B medical conditions on form instructions (#9 of FAQs).
- Deleting the sentence explaining that vaccine requirements for immigrants are based on American Council Immunization Practices recommendation to avoid unnecessary confusion.
- Plain language and clarifying edits.
- Standard language updates under sections such as General Instructions, USCIS Information, Processing Information, Penalties, etc. on form instructions.

<b>Data collection Activity/Instrument</b>	<b>Program Change (cost currently on OMB Inventory)</b>	<b>Program Change (New)</b>	<b>Difference</b>	<b>Adjustment (cost currently on OMB Inventory)</b>	<b>Adjustment (New)</b>	<b>Difference</b>
Form I-693				0	\$303,920	\$303,920
<b>Total(s)</b>				<b>0</b>	<b>\$303,920</b>	<b>\$303,920</b>

There is an increase in the estimated public cost burden associated with this information collection by \$303,920. This increase is a result of an adjustment in agency estimates based on a technical change of accounting for the estimated out-of-pocket costs that respondents may incur to obtain medical examinations with this information collection request as described under item 13 above.

- 16. For collections of information whose results will be published, outline plans for tabulation, and publication. Address any complex analytical techniques that will be used. Provide the time schedule for the entire project, including beginning and ending dates of the collection of information, completion of report, publication dates, and other actions.**

This information collection will not be published for statistical purposes.

- 17. If seeking approval to not display the expiration date for OMB approval of the information collection, explain the reasons that display would be inappropriate.**

USCIS will display the expiration date for OMB approval of this information collection.

**18. Explain each exception to the certification statement identified in Item 19, “Certification for Paperwork Reduction Act Submission,” of OMB 83-I.**

USCIS does not request an exception to the certification of this information collection.

**B. Collection of Information Employing Statistical Methods.**

There is no statistical methodology involved with this collection.
