INTRO1A Hi, I'm _____. My partner and I are conducting a survey for the US Department of Transportation about tire pressure monitoring systems. We would like to ask you some quick questions and give you some information about your vehicle's system and its current status. It should take five to ten minutes, about the time it takes to fill your car. Is this ok with you?

[INTERVIEWER: CONTINUING WITH INTERVIEW?]

1. YES
2. NO

///**IF INTRO1A=2 SKIP TO END: SET DISPO=26, Refusal at INTRO1A**///

TPMSEQ Some vehicles are equipped with a tire pressure monitoring system (known as TPMS). The TPMS checks the air in each tire. If the air pressure in any of the tires is low, a dash light comes on. Is this vehicle equipped with a TPMS—whether or not it is currently working?

1. YES

///IF SCREEN8=1 SET DISPO=37, Screen Out: Phase-in vehicle, no indication of TPMS, not reported as equipped

///ASK IF TPMSEQ=1, Respondent reports vehicle is equipped with TPMS///

TPMSTYPE There are two basic types of TPMS systems. A "direct" TPMS has a sensor in the valve stem or the wheel of each tire that measures the tire's air pressure. An "indirect" TPMS has wheel-speed sensors in the anti-lock braking system of each tire that calculate the tire's air pressure. Is the TPMS system in this vehicle direct or indirect?

1. DIRECT
2. INDIRECT
98. DON'T KNOW
99. REFUSED

///ASK IF TPMSEQ=1, Respondent reports vehicle is equipped with TPMS///

RECALIB Occasionally the TPMS system in a vehicle may need to be "reset" or recalibrated. Do you know what would be required to recalibrate the TPMS system in this vehicle?

NEXTVEH How important is it to you that your next personal vehicle be equipped with a TPMS system? Would you...

1. Strongly prefer the vehicle be equipped with TPMS?
2. Somewhat prefer the vehicle be equipped with TPMS?
3. Have no preference whether the vehicle is equipped with TPMS?
4. Somewhat prefer the vehicle NOT be equipped with TPMS?

DISABLE2 Based on the model year of your vehicle, it should have been manufactured with a TPMS system, but during our vehicle inspection we were not able to confirm that your vehicle has a functioning TPMS system. Has the TPMS system in this vehicle been disabled?

1. YES

1. CONTINUE

Respondents continuing past this point will be given a complete ("in-depth") interview.

///**ASK IF TPMSMALF=1,2,4, Indicator lights on @ ON**///

INTRO1C When we checked your dash lights, we found that your vehicle is equipped with TPMS. As I mentioned earlier, the TPMS checks the air in each tire, and if the air pressure in any of the tires is low, a dash light comes on. This same dash light will flash or a separate TPMS malfunction light will come on if the TPMS system malfunctions - for example, due to a damaged pressure sensor. Properly inflating all of the vehicle's tires should cause the low pressure light to turn off, but it will NOT fix a malfunctioning TPMS system and the TPMS malfunction light will not turn off. This survey is specifically concerned with TPMS system malfunctions.
