Summary

Milk Disposition and Income: Final Estimates by State, 2008-2012, U.S. Department of Agriculture, Agricultural Statistics Board, National Agricultural Statistics Service, Statistical Bulletin No. 1041.

Introduction: This bulletin presents final estimates, including revisions made by the Agricultural Statistics Board (ASB), for the production years 2008 through 2012. The disposition and income from milk production for 2008-2012 were published during calendar years 2009-2013. Data included in this publication provide a historic record and a benchmark for current estimates. Number of milk cows, production per cow, and total production were published in Statistical Bulletin No. 1036.

Procedures: Revisions were made after a thorough review of the original survey data and all additional data now available, including the 2012 Census of Agriculture. Other data series considered included Federal Milk Market Orders, receipts of milk by plants and dealers, and any other available administrative information. The 2008-2012 estimates shown herein are considered final and will not be revised again. Beginning in January 2011, State and United States level fluid grade and manufacturing grade milk price estimates were discontinued.

At the National level, revisions to estimates of milk production and annual number of milk cows were less than one percent.

Agricultural Census Publications: The U. S. Department of Agriculture's National Agricultural Statistics Service (NASS) released several products from the 2012 Census of Agriculture on May 2, 2014. The Census is the leading source of statistics about the Nation's agricultural production and the only source of consistent, comparable data at the county, State, and national levels. The Census includes all places from which \$1,000 or more of agricultural products, including government payments, were produced and sold, or normally would have been sold, during the census year. Census publications also include demographic items such as sex of operator, residence on or off the farm, days worked off farm, years present on farm, age group categories, race, and number of persons living in each household.
