The Drug Enforcement Administration (DEA) has considered the factors in 21 U.S.C. 823, 952(a) and 958(a) and determined that the registration of Alltech Associates, Inc., to import the basic classes of controlled substances is consistent with the public interest and with United States obligations under international treaties, conventions, or protocols in effect on May 1, 1971. SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (i.e., employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accord with the Paperwork Reduction Act of 1995 (PRA–95) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (the OSH Act) (29 U.S.C. 651 et seq.) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and

accidents (29 U.S.C. 657). The OSHA Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

Certification of repair (§ 1910.177(d)(3)(iv)). This paragraph requires that when restraining devices and barriers are removed from service because they are defective, they shall not be returned to service until they are repaired and reinspected. If the repair is structural, the manufacturer or a Registered Professional Engineer must certify that the strength requirements specified in (§ 1910.177(d)(3)(i) of the Standard have been met.

The certification records are used to assure that equipment has been properly repaired. The certification records also provide the most efficient means for OSHA compliance officers to determine that an employer is complying with the Standard.

Marking or tagging of wheel components (§ 1910.177(e)(2)). This paragraph requires that defective wheels and wheel components “be marked or tagged unserviceable and removed from the service area.” Under this requirement, OSHA is providing employers with sufficient information from which they can derive the wording to use in marking the object or constructing a tag. Therefore, this provision imposes no paperwork burden because it falls within the portion of 5 CFR 1320(c)(2) that states, “The public disclosure of information originally supplied by the Federal government to the recipient for the purpose of disclosure to the public is not included within this definition [of ‘collection of information’]”.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the Agency’s functions, including whether the information is useful;
- The accuracy of OSHA’s estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB extend its approval of the information collection requirements contained in the Standard on Servicing Multi-Piece and Single Piece Rim Wheels (29 CFR 1910.177). OSHA is proposing to retain its current burden hour estimate of one (1) hour. The Agency will summarize any comments submitted in response to this notice and will include this summary in its request to OMB.

Type of Review: Extension of a currently approved collection.

Title: Servicing Multi-Piece and Single Piece Rim Wheels (29 CFR 1910.177).
