

APPENDIX A. HOUSING SEARCH STUDY MODULES

Screening Protocols

Hello, thank you for calling about the Housing Search Study. My name is ____ and I work at Decision Information Resource, Inc.; we are a survey firm working with the Urban Institute, a nonprofit research organization based in Washington DC. Urban Institute is conducting a study of renters who have recently moved or who are planning to move to a new home within the Washington, DC, Virginia, Maryland metropolitan area. The U.S. Department of Housing and Urban Development is funding this study to find out more about what the housing search process is like for people who are looking for a place to rent—that is, what you look for in a place to live, and how you make decisions about where and how to search. I'd like to ask you a few screening questions to make sure that you are eligible to participate; these screening questions will take about two minutes. If you are eligible, we'll begin the study. The study is completely voluntary and you can refuse to answer any question you don't feel comfortable answering. You can also stop the study at any time. The researchers involved in the study respect your privacy and will keep your information confidential. Your name will not be associated with the answers you give us. Is it OK to continue?

Remember that these first few questions are just screening questions to find out if you are eligible to take part in the study.
