**Hay zika en Puerto Rico**

Como médico, me importa la salud de todos. Muchas personas infectadas con el virus del Zika no manifestarán síntomas o solo tendrán síntomas leves. Sin embargo, la infección por el virus del Zika durante el embarazo puede causar defectos congénitos como la microcefalia. Un bebé que nace con microcefalia necesitará atención médica y cuidados toda su vida. Toma medidas para proteger a nuestra comunidad, a las mujeres embarazadas y a los bebés.

- Renueve el agua acumulada
- Usa repelente contra insectos
- Usa condones si tu pareja está embarazada
- Cúbrete cuando estés afuera

Así es como protegemos a la próxima generación.

**Hay zika en nuestra comunidad**

**No conocíamos a alguien preocupado por el zika.**  
Nosotros como abuelos estamos protegiendo a nuestra hija y a todos los bebés en nuestra comunidad con estas medidas:

- Remueve el agua acumulada
- Usa repelente contra insectos
- Usa condones si tu pareja está embarazada
- Cúbrete cuando estés afuera

**¡Tú también puedes!**

## PRDH Zika Campaign

**ESTA LUCHA CONTRA EL ZIKA**  
**ERES TU QUIEN LA DETIENE**

**4 DE 5 PERSONAS con ZIKA**  
muestran síntomas

Si no tomamos medidas correctas, estaremos a sólo unos pasos del ZIKA y a suertes nos rodean

Unos pequeños detalles que nos ayudan a prevenir el zika son: usar repelente, cubrirnos y evitar las picaduras.

**¡NO DEJA HACERTE EL ZIKA!**
