Puerto Rico will rec	US will receive \$25 to participate eive \$75 for participation in an 1 receive \$75 to complete an on	in-person 90-minute focus g	
Central location in		Focus group: X	
Online Interview: Telephone intervie		ndividual in-depth interview o): Yes	(cognitive interview): X
Other (describe):	Online data collection methods	may also be used for surveys	s, focus groups, and interv

(Please provide 2-3 sentences below.	.)						
CDC is developing and implementing an as-needed mechanism to collect qualitative and quantitative data							
to provide rapid feedback on new messages developed by CDC's Joint Information Center (JIC)/							
Emergency Operation Center (EOC) as part of its response to Zika virus disease. These Health Marketing							
Service requests may be initiated for a variety of audiences. CDC is also developing focus groups for male							
partners of pregnant women in Puerto Rico as part of this response.							
6. Category of time sensitivity: (Pleas	e check one below)						
Health emergency: X	cess:						
Press coverage correction:	Time-limited congressional/administrative mandate:						
Trend Tracking	Ineffective existing materials due to historical event/social trends:						
7. Describe nature of time sensitivity: (Please provide 2-3 sentences below.)							
Zika virus disease is an emergent health issue with serious health consequences particularly for pregnant women and their fetuses. There is much that is still unknown about Zika virus disease but there is an urgent need to disseminate critical preventive health information for risks that are currently known.							
8. Number of burden hours requested: 342 BURDEN HOURS
