Form Approved OMB No. 0920-0572 Expiration Date: 03/31/2018

Public reporting burden of this collection of information is estimated to average 35 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC/ATSDR Information Collection Review Office, 1600 Clifton Road NE, MS D-74, Atlanta, Georgia 30333; ATTN: PRA (0920-0572).

* 1. The results of this survey will help the Centers for Disease Control and Prevention (CDC) develop meaningful messages/materials for a national sepsis awareness and prevention education effort. The survey is divided into four sections that test campaign concepts/messages/materials. These sections are:

1. Section 1. Visual Identities – We will ask you questions about visual identities—similar to logos that may be used to raise awareness about sepsis. These visual identities could be used on print materials, like fact sheets, in television ads, or on webpages.

2. Section 2. Print Ads: We will ask you questions about different concepts, or ideas, that could be used in print media, such as magazine ads or posters. These concepts are still in development.

3. Section **3.** Television Ad Concepts: We will ask you questions about different creative concepts, or ideas, that could be used in television ads. The concepts are still in development, so you will not see anything that looks like a final ad. Rather, you will see some pictures and hear some audio to help you imagine what each TV ad might look like.

4. Section 4. Sepsis Content : We will ask you questions about sepsis content for healthcare professionals. The content could be used in different formats (e.g., posters, brochures, fact sheets) to help prompt/remind healthcare professionals to prevent, suspect, and act fast against sepsis.

The survey should take no longer than 35 minutes to complete. It is your choice to answer the questions, and you can stop at any time. Your contact information will be kept separate from your survey responses and your name will never be linked to any responses. As a token of appreciation for completing and submitting the survey, you will receive an email with "points" that you can use to redeem online or at a retailer (\$55 value).

May we ask you some questions to see if you are a good match to take this survey?

Visual Identity Testing

First, we will show you some options for visual identities - similar to logos - that may be used to raise awareness about sepsis. These visual identities could be used on print materials, like fact sheets, in television ads, or on webpages.

There are a total of 5 visual identities that include a name, slogan, and design and might be used to raise awareness about sepsis. We will show you one at a time and ask that you indicate your level of agreement with the following statements by marking 'strongly disagree', 'somewhat disagree', 'neutral', 'somewhat agree', or 'strongly agree'.

Print Ad Concept Testing

Now, we will show you three different concepts, or ideas, that could be used in print media, such as magazine ads or posters. These concepts are still in development.

There are a total of 3 concepts or ideas that might be used to raise awareness about sepsis. We will show you one at a time and ask that you indicate your level of agreement with the following statements by marking, 'strongly disagree', 'somewhat disagree', 'neutral', 'somewhat agree', or 'strongly agree'. Please imagine yourself seeing these as an ad in a magazine as you review each.

" DO YOU DO YOU KNOW ABOUT SEPSIS?"

It's time to talk about sepsis. Because, in a matter of days or hours, this condition can lead to tissue damage, organ failure, and potentially death. Because the elderly, infants, and people with weaker immune systems are at greater risk. Because you can take simple steps to prevent infections that can lead to sepsis.

Ask your doctor how you can manage your health conditions to prevent infections that lead to sepsis.

Learn more about sepsis at CDC.gov/sepsis.

SEE SEPSIS CLEARLY BEFORE IT'S TOO LATE.

Infections can put you and your family at risk for a lifethreatening condition called sepsis. Sepsis is your body's extreme response to an infection and it can kill within hours, especially if it is not treated in time.

Knowing the signs and symptoms can help you recognize sepsis. And preventing infections in the first place can help stop sepsis before it impacts you or your family members.

Learn more about sepsis and simple prevention measures you can take to stay healthy. Visit CDC.gov/sepsis.

Infections can put you and your family at risk for sepsis. Sepsis is your body's extreme response to an infection and it can kill within hours, especially if it is not treated in time.

Don't let this potentially deadly chain reaction reach its end. If you know the causes, signs, and symptoms then you can help stop sepsis.

Learn more about sepsis and the simple steps you can take to stay healthy. Visit CDC.gov/sepsis.

Television Ad Concept Testing

Now, we will show you 3 different creative concepts, or ideas, that could be used in television or online ads. The concepts are still in development, so you will not see anything that looks like a final ad. Rather, you will see some pictures and hear some audio to help you imagine what each ad might look like. As each one is presented, please imagine that you are watching it on television or on the internet.

There are a total of 3 concepts that might be used to raise awareness about sepsis. You will see one concept at a time and it will be played twice. Please indicate your level of agreement with the following statements by marking, 'strongly disagree', 'somewhat disagree', 'neutral', 'somewhat agree', or 'strongly agree'.

Sepsis Content Testing

Please review the sepsis content below for healthcare professionals. The content could be used in different formats (e.g., posters, brochures, fact sheets) to help prompt/remind healthcare professionals to prevent, suspect, and act fast against sepsis.

Sepsis Content:

You have the power to prevent and recognize sepsis in patients.

PREVENT AND EDUCATE.

Educate your patients about:

- The early symptoms of severe infection and sepsis.
- Taking care of chronic illnesses to help prevent infections.
- Infection prevention measures, such as hand hygiene and vaccination against infections.

• When to seek care for an infection, especially for patients at higher risk (e.g., adults over 65, infants under 1, and patients with chronic illnesses, weaker immune systems, or indwelling medical devices).

SUSPECT.

One or more of the following signs may indicate sepsis:

- · Shivering, fever, or very cold
- Extreme pain or discomfort
- Clammy or sweaty skin
- Confusion or disorientation
- Short of breath
- · High heart rate

Common infections can lead to sepsis. Among adults with sepsis:

· 35% had a lung infection (e.g., pneumonia)

- 25% had a urinary tract infection (e.g., kidney infection)
- 11% had a type of gut infection
- 11% had a skin infection

ACT FAST.

•

If you suspect sepsis, start antibiotics and other medical care immediately. Act fast to make sure the patient is treated right away. Every minute matters.

76. Now that you have reviewed the sepsis content, please indicate your level of agreement with the following statements by marking 'strongly disagree', 'somewhat disagree', 'neutral', 'somewhat agree', or 'strongly agree'.

	Strongly disagree	Somewhat disagree	Neutral	Somewhat agree	Strongly agree
