

“DO YOU
KNOW
ABOUT
SEPSIS?”

It's time to talk about sepsis. Because, in a matter of days or hours, this condition can lead to tissue damage, organ failure, and potentially death. Because the elderly, infants, and people with weaker immune systems are at greater risk. Because you can take simple steps to prevent infections that can lead to sepsis.

Ask your doctor how you can manage your health conditions to prevent infections that lead to sepsis.

Learn more about sepsis at [CDC.gov/sepsis](https://www.cdc.gov/sepsis).
