

STOP SEPSIS

SIMPLE ACTIONS CAN PREVENT SEPSIS.

Infections can put you and your family at risk for sepsis. Sepsis is your body's extreme response to an infection and it can kill within hours, especially if it is not treated in time.

Don't let this potentially deadly chain reaction reach its end. If you know the causes, signs, and symptoms then you can help stop sepsis.

Learn more about sepsis and the simple steps you can take to stay healthy. Visit [CDC.gov/sepsis](https://www.cdc.gov/sepsis).
