

A chainsaw is shown cutting through a cucumber on a wooden cutting board. The chainsaw's blade is positioned horizontally, with several slices of cucumber already cut and stacked in the foreground. The background is a blurred blue wall. The text is overlaid on the right side of the image.

AN ANTIBIOTIC IS THE WRONG TOOL TO TREAT A VIRUS.

Antibiotics are powerful tools. But, as with any powerful tool, it's important to only use them for the right job. Antibiotics treat bacterial infections, not viruses. When they're not needed, antibiotics do more harm than good. So talk with your doctor about the best way to treat your illness.
