Subject: Fw: public comment on federal register 2 yrs ago steroid injections causes disease outbreak - lousy health system in nusa

cdc with its close alliance iht big pharma and big medicine is part of the problem on why good health evades teh usa these days. this agency is full of incompetency. they refuse to listen to mothers who see their kids every day and report what happens after some vaccine injections. this agency refuses to beliwve that some systems completely reject the vaccines made from chicken eggs, 1 million of which were returned for being contaminated by ecoli a year ago. the continuous finding of salmonella and ecoli in eggs shows how contamination can be present continually in vaccines. this agency just gos on as if nothing is wrong while millions of ameican kids and kids all over the world are now turning up autistic.

i have zero faith in what this fat cat bureaucracy in corrupt washington dc can do right. i believe it is nothing. i very much oppose american taxpayers funding this latest thing. it is also interesting that the massive effvfect of these steroid injections causing deaths were not publicized in more detail two years ago. hiding their failures as usual. this comment is for the public recod. please receipt. jean public jeanpublic1@yahoo.com
