

## **Privacy Act Checklist**

No personally identifiable information will be collected, stored, maintained, or shared for this information collection request.

### Privacy Impact Assessment

During the data collection process, respondent information will be kept secure. No IIF is being collected from respondents. The survey does not ask for any information related to individual patients. The survey primarily asks for information regarding laboratorians' work and processes. Survey responses will be submitted via a paper or electronic survey, and neither the survey operations staff nor subsequent data analysts will have access to the identities of the respondents. No patient identifiers will be retained in the final survey dataset.
