

CAP-CDC Cooperative Agreement
Acute Leukemia (AL) Baseline Survey Pilot Results

Number of invited participants: 9

Number of participants: 7

Survey administered online via Survey Monkey

Summary of Pilot Participants Comments/Suggestion	Action Taken
Grammatical changes to introduction	Changed per suggestions
Question 4 - Add "current medication" to list of clinical information routinely included in the pathology report	Changed per suggestion
Question 6, 8, 10 - Add "FISH" and "Molecular Testing" to list of sample/tests evaluated for initial diagnosis of AL	Changed per suggestions
Question 8 – rephrase to include the words "routinely" or "most frequently" performed	Changed per suggestion to include the word "routinely"
Question 12 – rephrase to include the word "typically"	Changed per suggestion
Question 14 – rephrase the question	Sustained – no other comments were provided to state exactly what was unclear and no other participants stated the question was unclear
Question 16 – rephrase the question; unclear whether or not this question is tied to the previous one	Question rephrased
Question 18 – unclear as to whether inquiring about bone marrow specimens or peripheral blood smears; need more response options	Question and response options rephrased
	Question 20 removed – same question asked in a different way earlier in the survey
Question 22 – include additional response options	Sustained – the panel believes that the suggested responses already fit into the current response choices
Question 28 – change "lymphoma" to "leukemia"	Changed per suggestion
Questions 28-52 – confusion about whether these questions are tied together	Question 28 was changed to table format to include a list of tests and the frequency the test is performed
Question 54 – need more response options	Sustained – panel believes that the suggested responses already fit into the current response choices
Question 56 – clarify if "final" means before or after addendum	Changed to explicitly state "after addendum have been issued"
Question 58 – clarify definition of an ancillary test	Sustained

Acute Leukemia Guideline Baseline Survey

Q60 Overall Survey Review

Answered: 6 Skipped: 1

	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree	Total
The survey questions are easy to understand.	0.00% 0	0.00% 0	0.00% 0	100.00% 6	0.00% 0	6
The answer choices are clearly written.	0.00% 0	0.00% 0	0.00% 0	100.00% 6	0.00% 0	6
I was always able to find an appropriate answer to choose.	0.00% 0	16.67% 1	16.67% 1	66.67% 4	0.00% 0	6
The survey format (font and spacing) was acceptable.	0.00% 0	0.00% 0	0.00% 0	50.00% 3	50.00% 3	6
The order of questions was easy to follow.	0.00% 0	0.00% 0	0.00% 0	50.00% 3	50.00% 3	6

Acute Leukemia Guideline Baseline Survey

Q62 What did you like best about the survey?

Answered: 3 Skipped: 4

#	Responses	Date
1	Easy to select answers, survey flow was logical.	12/8/2014 7:08 PM
2	The information/data is applicable to my daily practice.	12/2/2014 1:11 PM
3	Made me think more carefully about our process.	12/1/2014 5:16 PM

Acute Leukemia Guideline Baseline Survey

Q63 If given the option to change parts of the survey what changes would you make?

Answered: 4 Skipped: 3

#	Responses	Date
1	None, just clarifying questions with more specifics, also add the word 'typical' or 'most cases' to capture the normal practice, since a small percentage of cases will always be handled differently.	12/8/2014 7:08 PM
2	Please see my previous comments on individual questions.	12/6/2014 3:43 PM
3	Perhaps add a question about whether you make a definitive diagnosis of acute leukemia based only on peripheral blood morphologic and ancillary testing.	12/1/2014 5:16 PM
4	comments made along the way	12/1/2014 3:43 PM

Q64 What is your specialty?

Answered: 7 Skipped: 0

Answer Choices	Responses
