

B. COLLECTIONS OF INFORMATION EMPLOYING STATISTICAL METHODS

The survey will be used for the sole purpose of determining the strategies and activities LMCTC participants have chosen to implement. Statistical methods will not be employed for this data collection; however, descriptive statistics will be used, such as the number of municipalities and counties that have signed up for LMCTC, the activities they have chosen to implement, and their geographic location.

The government project officer for this study is:

Robin McKinnon, PhD
US Department of Health and Human Services
Office of Assistant Secretary for Health
200 Independence Ave, SW
Washington, DC 20201
