Brief BBS Instructions.

- All forms must be completed and returned by July 15; if you will not be able to conduct the survey, please contact your provincial, state or territorial BBS coordinator, or the national BBS office, ASAP.
- START EXACTLY ONE-HALF HOUR BEFORE SUNRISE. Start time provided on first page of data sheets.
- Each stop should be for 3 minutes and routes should be completed within 4 - 5 hours.
- Count individuals of each species seen within 0.25 miles/0.4 km or heard from any distance.
- Only count adult birds; do not count young in the nest, fledglings, or the dependent young of waterbirds, gallinaceous birds, and shorebirds. Do not count individuals more than once.
- Write in any species not listed on form; lower case letters and abbreviations acceptable. If it is a nonbreeding species for your area, please fill in the corresponding box next to the write-in species.
- In row provided at bottom of field sheets record number of vehicles that pass by during each 3-min stop. Also fill in the "excessive noise" bubble if you feel constant excessive noise other than passing vehicles (e.g. a nearby lawnmower, crop duster, or babbling brook) seriously impaired your ability to hear birds at that stop.
- Record weather conditions and time at beginning and end of route, and complete route summary and management information.
- For optimal character recognition, press firmly with dark pencil or ink pen (not felt-tipped) when completing the forms.
- Verify your address before returning form, and return route map with your completed data sheets.

Always read the detailed instructions before running your route.
