

2015 INSTRUCTION MANUAL FOR REPORTING ON THE MONTHLY M3 SURVEY

MANUFACTURERS' SHIPMENTS, INVENTORIES, AND ORDERS

For questions call (301) 763-4832 or the Census contact listed on your report form.

DESCRIPTION OF M3 SURVEY

The Manufacturers' Shipments, Inventories, and Orders (M3) survey is currently the only survey which provides broad-based monthly statistical data on the economic conditions in the domestic manufacturing sector. It is designed to measure current industrial activity and to provide an indication of future production commitments. The value of shipments measures the value of goods delivered during the month by domestic manufacturers. Estimates of new orders serve as an indicator of future production commitments and represent the value of new orders received during the month, net of cancellations. Substantial accumulation or depletion of backlog of unfilled orders measures excess (or deficient) demand for manufactured products. The level of inventories, especially in relation to shipments, is frequently used to monitor the business cycle.

Survey results are used extensively by the executive branch of the Government in developing economic, fiscal, and monetary policies. Senior officials of the President's Council of Economic Advisers, the Federal Reserve Board, and the Treasury Department are some of the regular users of M3 data. In addition, these data provide important components of the widely used estimates of the gross domestic product (GDP). The business community, including trade associations and corporate economists, also recognizes the usefulness of these data to industrial analysis. Since the results of this survey contribute in such an important way to the assessment of economic conditions, particularly during periods of economic uncertainty, we urge you to study the specific reporting instructions for the survey and report as accurately and timely as possible.

The M3 survey panel includes nearly all manufacturing companies with \$500 million or more annual shipments and a selection of smaller firms. Data are compiled and published for shipments, new orders, order backlog (unfilled orders), and inventories for the entire manufacturing sector covering 92 industry categories. The monthly estimates are prepared by using the month-to-month percent change of the reporting panel to bring forward the industry estimates. **It is, therefore, important that the data reported in consecutive months be comparable.**

This survey has been approved by the Office of Management and Budget and given an OMB approval number. This number appears at the top of the report form. If this number was not displayed, we could not conduct this survey or request your participation.

This information collection conforms to legal and administrative standards established by the Federal Government (Title 13, United States Code) to assure confidential treatment of statistical information. The information you provide will be used only for statistical purposes and will not be published or released in any form that would reveal specific information reported by any individual identifiable respondent. The Census Bureau has determined that the information you provide, as well as the fact that you have participated in this survey, is exempt from public disclosure under the Freedom of Information Act. Although you are not required to respond to this statistical survey, your cooperation is needed to make the results comprehensive and accurate.

The reporting burden for this collection of information is estimated to vary from 10 to 40 minutes per report form, with an average of 20 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to: Paperwork Project 0607-0008, U.S. Census Bureau, 4600 Silver Hill Road, Washington, DC 20233-6900. You may e-mail comments to Paperwork@census.gov; use "Paperwork Project 0607-0008" as the subject. Respondents are not required to respond to any information collection unless it displays a valid approval number from the Office of Management and Budget.

The data are available on the internet at census.gov/m3. If you are interested in knowing more about the manufacturing statistics compiled by the Census Bureau, call (301) 763-4832 or the Census contact listed on your form.

Part A - REPORTING INSTRUCTIONS

1. Scope of survey

This survey collects statistics on **domestic manufacturing** activities of companies located in the United States. Activities of foreign affiliates or subsidiaries should be excluded. Whenever possible, divisional reporting rather than consolidated reporting is preferable if divisions of your company are engaged in diverse manufacturing activities. (See Part G for Industry Category List.)

2. When to report

You should submit your completed report as soon as possible because timely publication of data from this survey is most important. The first results of this survey are published about 18 days after the end of the survey month. Reports received by the preceding day can generally be included in the early (or advance) estimates. The second publication of the survey data is released one week later based on receipts through the 30th of the month; the final estimates include all other receipts.

3. How to report

The M3 survey is automated to allow quick inclusion of your reported data into our published estimates. There are two methods to report your data:

- (1) **Internet Reporting** - This option is our preferred method of collecting data. Internet reporting is now available for all companies. If you do not currently report via the Internet, your User ID and password can be found on the form. Visit econhelp.census.gov/m3 to log on and report. If you need assistance or do not receive a form, please call our staff on 301-763-4832. For detailed instructions to report using this system, see Part D.
- (2) **Facsimile** - The survey form can be faxed to the toll-free number **1-800-845-8238**.

PLEASE DO NOT MAIL IN YOUR SURVEY FORM.

Mailing in a form and also using another method of reporting can create a duplicate form in our system. If none of these reporting methods are acceptable to you, please contact our staff on 301-763-4832 or call the Census contact listed on your survey form.

4. Large changes in your data between months

If there are significant increases or decreases in the reported figures from the preceding month, please use the "Remarks" section of the form to explain whether such differences result from

- (1) accounting periods other than 4-week, 5-week, or calendar month;
- (2) strike or plant shutdowns;
- (3) unusual seasonal patterns;
- (4) acquisition or disposition of establishments or other units; and/or
- (5) changes in the basis for reporting.

5. The use of estimates

Many companies with late consolidation schedules can make reasonable estimates of their figures several days in advance of the availability of actual data. Under such conditions, we encourage you to provide early estimates. Later, when the actual data is available, you can resubmit it using any method listed above.

6. Reviewing previously reported data

It is important that the Census Bureau be aware of revisions to previously reported data. See sample report form on page 6. The data you reported for the two previous periods are imprinted on your form, if the reports were processed before the 21st day following each survey month. Please review and correct this data as necessary. If you have revised data for months not on the form, please provide the time frame and corrected data in the "Remarks" section or call and give this data to your Census contact on your report form.

7. Description of your manufacturing activity

Each manufacturing report has been classified into one of 92 separate industry categories, all of which are listed in Part G. A description of your industry category is printed on the front of your report form. Review your category description. If this description does not represent your manufacturing process, please indicate the discrepancy in the "Remarks" section of your report form. Categories are based on the North American Industry Classification System (NAICS). More information is available at census.gov/eos/www/naics/index.html.

8. Company organization information

Please update your mailing address or company contact when changes occur. Indicate the changes in the "Remarks" section on the form.

Part B - DEFINITIONS OF DATA ITEMS

1. Accounting period

It is important that the data reported represent the manufacturing activities of the month specified. Mark the **one** box that best describes the accounting period for which you are reporting your firm's manufacturing activity (calendar month, 4-week, 5-week, or other). If you indicate "other" please provide the dates covered for the period on the form. If your records are based on thirteen 4-week periods, please enter in the "Remarks" section the exact dates covered by your report.

2. Items 2 through 8 - General Instructions

Report all figures in **thousands of dollars**, without decimals. You should report the net selling value after discounts and allowances. Values should not only include the direct cost of production, but also a reasonable portion of other costs (company overhead) and profits. Valuations for all inventory items should use any valuation method other than LIFO (last in, first out).

Part B - DEFINITIONS OF DATA ITEMS - Continued

Item 2 - Net Shipments (Sales)

Manufacturers' shipments measure the dollar value of products sold by manufacturing establishments and are based on net selling values, f.o.b. (free on board) plant, after discounts and allowances are excluded. Freight charges and excise taxes are excluded. Where the products of an industry are customarily delivered to distributors or consumers by the manufacturing establishment (such as in certain food industries - fluid milk, bakery, soft drinks), the value is based on delivered price rather than f.o.b. plant price. Multi-industry companies report value information for each industry category as if it were a separate economic unit. Thus, products transferred from one plant to another are valued at their full economic value.

Include:

- **Domestic** manufacturing only.
- Shipments for the month requested, neither cumulative nor lagged.
- Transfers to your other manufacturing locations that do additional manufacturing in a **different** M3 industry category.
- Shipments **to** distributors.
- Services that are included in your contracts for products shipped.
- For long term contracts, such as large ships, aircraft, tanks, etc., the value should be reported as an estimate of the value of work done during the survey month.

The value of work done may be estimated by:

- Multiplying the estimated percentage of work completed during the month by the estimated price of the product, or
 - Net billings for work done during the month.
 - Estimated value of newly produced products intended for lease or rental that were shipped in the reference month.
- The value can be estimated by:
- Using the actual prices charged for comparable products sold.
 - Estimating the price that would be charged if the product were offered for sale, or
 - Using the capitalized value of the product plus indirect costs and profit margins that are not capitalized.
 - Shipments of reconditioned equipment that was substantially rebuilt under factor conditions.

If the shipments value reported includes more than 20% resale, that is, products bought and sold without further manufacture, please indicate that in the "Remarks" section.

Exclude:

- Nonmanufacturing activities (wholesale, retail, etc.)
- Freight charges and excise taxes.
- Transfers to other manufacturing locations of your company that manufacture in the same M3 industry category **if** the value will be reported by other locations.

- Shipments by foreign subsidiaries.
- Shipments **from** distributors.
- Services-only type sales.
- Conversion of a lease or rental contract to a purchase (the full estimated sales value of the contract should have been reported at the time of delivery).
- Estimates for research and development, except prototype production.

Item 3 - New orders (Net of cancellations)

A new order is a communication of an intention to buy for immediate or future delivery. Orders data are not collected from industries that have immediate deliveries. See Part G to determine if the M3 survey request orders data for your industry category. Only orders supported by binding legal documents (such as signed contracts, letters of intent, or letters of award) should be included. Reported data should include all new orders received during the month less cancellations.

Include:

- Value of orders received during the reporting period for products and services which will be delivered at a future date.
- Value of orders for immediate delivery that have resulted in sales or shipments during the reporting period.
- Net value of contract modifications, additions, and adjustments, including price changes, which increase or decrease the sales value of the related orders, when the parties concerned are in substantial agreement.
- Only those orders that are supported by binding adjustments, including price changes, which increase legal documents, such as signed contracts or letter adjustments, including price changes, which increase contracts.
- Orders for equipment to be leased or rented at the adjustments, including price changes, which increase estimated value.
- Orders for long-term contracts that are funded. If adjustments, including price changes, which increase funded on a flow basis, report only each phase that adjustments, including price changes, which increase is funded.
- Cancellations by deducting the value of existing adjustments, including price changes, which increase orders that were reported in previous periods.

Exclude:

- Options or contingencies.

Item 4 - Order Backlog (Unfilled orders), end of month

Generally, unfilled orders at the end of an accounting period are equal to unfilled orders at the beginning of the period, plus new orders net of cancellations received during the period, less net sales.

Include:

- Orders that have not yet passed through the sales account.
- Funded orders or portions of orders for which the value of work done has not been reported as sales.

Part B - DEFINITIONS OF DATA ITEMS - Continued

Item 5 - Total Inventory, end of month

Total inventories represent the value of the end-of-month stocks regardless of stage of fabrication (whether in the form of purchased materials and supplies, work in process, or finished goods). These inventories are valued at cost using any valuation method other than LIFO. Inventories associated with the non-manufacturing activities of your company are excluded.

Include:

- Current cost of total inventory (using any valuation method except LIFO) of **all goods owned by you located anywhere in the U.S. and at all stages of fabrication.**
- Inventories held in U.S. Customs warehouses that have not cleared customs as an export from the U.S.
- Inventories being transported to or from the U.S. (owned by the U.S. manufacturer).
- Inventories held in U.S. Customs warehouses or Foreign Trade Zone warehouses.
- Inventories held at sales branches if you hold title.
- Inventories in transit **only if you own title** to them.
- Values for long-term contracts funded on a flow basis consistent with sales or receipts, such as:
 - If work done during the month is included in your monthly sales, the inventory should be reduced consistent with the sales report; or
 - If total receipts are expected at the time of delivery, the value of work done should be accumulated in the inventory.

Note: Unlike GAAP, do not deduct progress billings from the reported inventory line items, i.e. inventories should be reported gross not net of progress billings.

Exclude:

- Inventories held at foreign subsidiaries.
- Goods for which you do not hold title such as government or customer-owned goods.
- The value of equipment used in the manufacturing process.

Total inventory at the end of the month must equal the sum of materials-and-supplies, work-in-process and finished goods.

Item 6 - Materials-and-supplies inventory

Include:

- All unprocessed raw and semifabricated commodities and supplies for which you have title.

Item 7 - Work-in-process inventory

Include:

- Accumulated costs of all commodities undergoing fabrication within your plants.
- Long-term contracts where the inventory costs are for undelivered items and the value of work done that has not been reported in sales.

Item 8 - Finished goods inventory

Include:

- The value of all completed products ready for shipment.
- All inventories and goods bought for resale requiring no further processing or assembly.

No accumulation of finished goods inventories should occur with long-term contracts unless the total sales receipts are not recorded until the time of delivery.

Part C - NONDEFENSE AND DEFENSE INDUSTRY CATEGORIES

For the following industry categories, information for nondefense and defense activities are requested separately.

- Small arms and ordnance and accessories (32E/F)
- Communications equipment manufacturing (34D/E)
- Search and navigation equipment manufacturing (34I/J)
- Aircraft manufacturing (36F/G)
- Aircraft engine and parts manufacturing (36H/I)
- Ship and boat building (36L/M)
- Guided Missile, Space Vehicle, and Parts Manufacturing (36P/Q)
- Military Armored Vehicle, Tank, and Tank Component Manufacturing (36R/T)

(See Part G for more details.)

The defense industry categories should include sales, inventories, and orders relating to foreign governments contracted through the Department of Defense (Foreign Military Assistance Program). Also include subcontracts with other companies where the prime contract is known to be with the Department of Defense.

The nondefense industry categories should include sales, inventories, and orders relating to all contracts not covered above. This includes contracts for the sale of military goods to foreign governments that were made directly between your firm and the foreign government (excluding Foreign Military Assistance Program). Sales, inventories and orders related to contracts with U.S. Government agencies other than the Department of Defense, such as National Aeronautics and Space Administration, Department of Energy, Federal Aviation Administration, and the Department of Homeland Security should also be included.

If your records do not permit reporting on the defense/nondefense basis described above, make reasonable estimates. If a reasonable estimate cannot be made, please call the Census contact listed on your report form so that further arrangements can be made. The quality of the defense/nondefense aggregate are some of the most useful estimates published for current economic analysis.

Part D - "INTERNET REPORTING INSTRUCTIONS"

Your Manufacturer's Shipments, Inventories, and Orders (M3) survey data can be submitted electronically via the Internet. This system is designed to make reporting fast, easy, and convenient.

1. Go to the Business Help Site at econhelp.census.gov/m3/ to access the M3 web survey.
2. Please follow links to the Manufacturers' Shipments, Inventories, and Orders (M3) login page.
3. Log in using your company's User ID and password and press the "Survey Log in" button. If you do not currently report via the Internet, your User ID and password can be found on the form. If you need assistance or do not receive a form, please call our staff on 301-763-4832.
4. Press the "Start" button on the Main Menu to begin reporting.
5. When finished, press "Submit This Form" at the bottom of the page. To ensure confidentiality, make sure you log out properly.
6. Please bookmark the following web page to report your data in future months:
econhelp.census.gov/m3

If you have questions, problems or need additional assistance, please call 301-763-4832, or go to econhelp.census.gov/m3/contactus.html to email your request.

Part E - SAMPLE M-3(SD) REPORT FORM

A sample report form is shown below, reduced in size. Explanatory remarks are provided in the margins.

Industry category description (see Part G).

Month and year of report.

Prompt reporting ensures the timely receipt of your data.

Name and telephone number of person to contact at the Census Bureau regarding this report.

To start reporting via the internet, use this User ID and Original Password.

Mark the box which best describes current accounting period.

Data for new orders and unfilled orders are only requested for some industries (See Part G).
