

## Justification for Change Request

### Purpose

CDC is requesting OMB approval for a non-substantial change to OMB 0920-0600 (Exp. 05/31/2016), entitled, “Model Performance Evaluation Program (MPEP) for Mycobacterium tuberculosis Drug Susceptibility Testing”.

### Description of Change

In this request, CDC is requesting approval for the following change:

- Entering results online using a revised survey instrument using Formstack® software (Formstack.com). This change is necessary due to retirement of ADOBE® FormsCentral software by ADOBE on July 28, 2015. After this date, CDC will no longer be able to use the current data collection instrument created and used to collect data online using ADOBE® FormsCentral.
- In the opinion of CDC, the format of the revised data collection instrument and ability to collect data online is equivalent to the prior data collection methods and will result in no change in burden to respondents.
