**TITLE OF INFORMATION COLLECTION:** Landsat Product Characteristics

**PURPOSE:** As a government agency, the USGS constantly needs to evaluate how it can better serve the taxpayers of the United States. The USGS is developing easier-to-use applications-ready Landsat science products in an effort to reduce the burden of data preprocessing on the end-users and provide products that can be more readily assimilated into data analysis software and decision support systems.

**DESCRIPTION OF RESPONDENTS:**

Identified researchers from nonprofits and academic institutions, and various other users who are familiar with Landsat data. These users would include: subscribers to the Landsat Update, and electronic newsletter that is published and distributed electronically; members of the USGS-sponsored Landsat Science Team; the members of the Department of the Interior (DOI) Remote Sensing Working Group (DOIRSWG); and remote sensing program and managers from the US Department of Agriculture. This is a targeted audience of approximately 1100 users from the scientific research and applications community.

**FEDERAL COST:** The estimated annual cost to the Federal government is approximately \$7,500 to setup the elicitation web page, compile a synthesis of the response, and to document the findings in a short internal white paper.

**If you are conducting a focus group, survey, or plan to employ statistical methods, please provide answers to the following questions:**

**The selection of your targeted respondents**

1. Do you have a customer list or something similar that defines the universe of potential respondents and do you have a sampling plan for selecting from this universe?  
 Yes  No

If the answer is yes, please provide a description of both below (or attach the sampling plan)? If the answer is no, please provide a description of how you plan to identify your potential group of respondents and how you will select them?

We have approximately 1000 subscribers to the Landsat Update, our electronic newsletter that members of the community voluntarily subscribe to, as well as another 100 scientists participating in, or affiliated with, the USGS-sponsored Landsat Science Team and the Department of the Interior Remote Sensing Working Group. This combined list has approximately 1100 individuals to whom we plan to extend the opportunity to respond.

---

**TITLE OF INFORMATION COLLECTION:** Provide the name of the collection that is the subject of the request. (e.g. Comment card for soliciting feedback on xxxx)

**PURPOSE:** Provide a brief description of the purpose of this collection and how it will be used. If this is part of a larger study or effort, please include this in your explanation.

**DESCRIPTION OF RESPONDENTS:** Provide a brief description of the targeted group or groups for this collection of information. These groups must have experience with the program.
