### **U.S. PRODUCERS' QUESTIONNAIRE**

### SILICOMANGANESE FROM AUSTRALIA

## This questionnaire must be received by the Commission by March 4, 2015

### See last page for filing instructions.

The information called for in this questionnaire is for use by the United States International Trade Commission in connection with its antidumping investigation concerning silicomanganese from Australia (Inv. No. 731-TA-1269 (Preliminary)). The information requested in the questionnaire is requested under the authority of the Tariff Act of 1930, title VII. This report is mandatory and failure to reply as directed can result in a subpoena or other order to compel the submission of records or information in your firm's possession (19 U.S.C. § 1333(a)).

### PART I.—GENERAL INFORMATION

**Background.** This proceeding was instituted in response to a petition filed on February 19, 2015, by Felman Production LLC, Letart, West Virginia. Antidumping duties may be assessed on the subject imports as a result of this proceeding if the Commission makes an affirmative determination of injury, threat, or material retardation, and if the U.S. Department of Commerce makes an affirmative determination of dumping. Questionnaires and other information pertinent to this proceeding are available at

http://www.usitc.gov/investigations/701731/2015/silicomanganese australia/preliminary.htm.

Silicomanganese. The products covered by this investigation are all forms, sizes and compositions of silicomanganese except low-carbon silicomanganese, including silicomanganese briquettes, fines, and slag. Silicomanganese is a ferroalloy composed principally of manganese, silicon, and iron, and normally contains much smaller proportions of minor elements, such as carbon, phosphorus, and sulfur. Silicomanganese is sometimes referred to as ferrosilicon manganese. Silicomanganese is used primarily in steel production as a source of both silicon and manganese, and sometimes as an alloying agent in the production of iron castings. Silicomanganese generally contains by weight not less than 4 percent iron, more than 30 percent manganese, more than 8 percent silicon and not more than 0.2 percent phosphorus. Silicomanganese is sold primarily in sized, lump form, with sizes generally varying from 8" x 4" to 2" x down, though all sizes of silicomanganese material are covered by the petition. Silicomanganese is classifiable under subheading 7202.30.0000 of the Harmonized Tariff Schedule of the United States ("HTSUS").

Low-carbon silicomanganese is excluded from the scope of this petition. Low-carbon silicomanganese contains lower levels of carbon than standard silicomanganese and higher amounts of silicon. It is sometimes referred to as ferromanganese-silicon. Low-carbon silicomanganese is used in the manufacture of stainless steel and special carbon steel grades, such as motor lamination grade steel, which requires a very low carbon content. The low-carbon silicomanganese excluded from this petition is a ferroalloy with the following chemical specifications by weight: minimum 55 percent manganese, minimum 27 percent silicon, maximum 0.10 percent phosphorus, maximum 0.10 percent carbon, and maximum 0.05 percent sulfur. Low-carbon silicomanganese is classifiable under HTSUS subheading 7202.30.0000.

**Reporting of information**.-- If information is not readily available from your records, provide carefully prepared estimates. If your firm is completing more than one questionnaire (i.e., a producer, importer, and/or purchaser questionnaire), you need not respond to duplicated questions.

<u>Confidentiality</u>.--The commercial and financial data furnished in response to this questionnaire that reveal the individual operations of your firm will be treated as confidential by the Commission to the extent that such data are not otherwise available to the public and will not be disclosed except as may be required by law (see 19 U.S.C. §1677f). Such confidential information will not be published in a manner that will reveal the individual operations of your firm; however, general characterizations of numerical business proprietary information (such as discussion of trends) will be treated as confidential business information only at the request of the submitter for good cause shown.

<u>Verification</u>.--The information submitted in this questionnaire is subject to audit and verification by the Commission. To facilitate possible verification of data, please keep all files, worksheets, and supporting documents used in the preparation of the questionnaire response. Please also retain a copy of the final document that you submit.

<sup>&</sup>lt;sup>1</sup> The size "2" x down includes lumps that are 2" in length and 2" or less in width.

Release of information.--The information provided by your firm in response to this questionnaire, as well as any other business proprietary information submitted by your firm to the Commission in connection with this proceeding, may become subject to, and released under, the administrative protective order provisions of the Tariff Act of 1930 (19 U.S.C. §1677f) and section 207.7 of the Commission's Rules of Practice and Procedure (19 CFR §207.7). This means that certain lawyers and other authorized individuals may temporarily be given access to the information for use in connection with this proceeding or other import-injury proceedings conducted by the Commission on the same or similar merchandise; those individuals would be subject to severe penalties if the information were divulged to unauthorized individuals. In addition, if your firm is a U.S. producer, the information you provide on your production and imports of silicomanganese and your responses to the questions in Part I of the producer questionnaire will be provided to the U.S. Department of Commerce, upon its request, for use in connection with (and only in connection with) its requirement pursuant to section 702(c)(4)/732(c)(4) of the Act (19 U.S.C. '1671a(c)(4)/1673a(c)(4)) to make a determination concerning the extent of industry support for the petition requesting this proceeding. Any information provided to Commerce will be transmitted under the confidentiality and release guidelines set forth above. Your response to these questions constitutes your consent that such information be provided to Commerce under the conditions described above.

I-1a. <u>OMB statistics</u>.--Please report below the actual number of hours required and the cost to your firm of completing this questionnaire.

Hours	Dollars

The questions in this questionnaire have been reviewed with market participants to ensure that issues of concern are adequately addressed and that data requests are sufficient, meaningful, and as limited as possible. Public reporting burden for this questionnaire is estimated to average 50 hours per response, including the time for reviewing instructions, gathering data, and completing and reviewing the questionnaire.

We welcome comments regarding the accuracy of this burden estimate, suggestions for reducing the burden, and any suggestions for improving this questionnaire. Please attach such comments to your response or send to the Office of Investigations, USITC, 500 E St. SW, Washington, DC 20436.

TAA information releaseIn the event that the U.S. International Trade Commission (USITC)
makes an affirmative final determination in this proceeding, do you consent to the USITC's
release of your contact information (company name, address, contact person, telephone
number, email address) appearing on the front page of this questionnaire to the Departments of
Commerce, Labor, and Agriculture, as applicable, so that your firm and its workers can be made
eligible for benefits under the Trade Adjustment Assistance program?

II-4a. **Production using same machinery.--** Please report your firm's production of products made on the same equipment and machinery used to produce silicomanganese, and the combined production capacity on this shared equipment and machinery in the periods indicated.

"Average production capacity" or "capacity" – The level of production that your establishment(s) could reasonably have expected to attain during the specified periods. Assume normal operating conditions (i.e., using equipment and machinery in place and ready to operate; normal operating levels (hours per week/weeks per year) and time for downtime, maintenance, repair, and cleanup; and a typical or representative product mix).

"**Production**" – All production in your U.S. establishment(s), including production consumed internally within your firm and production for another firm under a toll agreement.

Financial data reconciliationThe calculable line items from question III-9a (i.e., total net sales quantities and values, total COGS, gross profit (or loss), total SG&A, and net income (or loss)) have been calculated from the data submitted in the other line items. Do the calculated fields return the correct data according to your firm's financial records ignoring non-material differences that may arise due to rounding?			
	Yes	NoIf the calculated fields do not show the correct data, please double check the feeder data for data entry errors and revise.		
		Also, check signs accorded to the post operating income line items; the two expense line items should report positive numbers ( <i>i.e.</i> , expenses are positive and incomes or reversals are negativeinstances of the latter should be rare in those lines) while the income line item also in most instances should have its value be a positive number ( <i>i.e.</i> , income is positive, expenses or reversals are negative).		
		If after reviewing and potentially revising the feeder data your firm has provided, the differences between your records and the calculated fields persist please identify and discuss the differences in the space below.

	table III-9a.

III-12. <u>Asset values</u>.--Report the <u>total</u> assets (i.e., both current and long-term assets) associated with the production, warehousing, and sale of silicomanganese. If your firm does not maintain some or all of the specific asset information necessary to calculate total assets for silicomanganese in the normal course of business, please estimate this information based upon a method (such as production, sales, or costs) that is consistent with your firm's cost allocations in the previous question. Provide data as of the end of your firm's three most recently completed fiscal years.

**Note:** Total assets should reflect <u>net assets</u> after any accumulated depreciation and allowances deducted.

Total assets should be <u>allocated to the subject products</u> if these assets are also related to other products. Please provide a <u>brief explanation if there are any substantial changes</u> in total asset value during the period; e.g., due to asset write-offs, revaluation, and major purchases.
