¹ The production capacity (see definitions in instruction booklet) reported is based on operating _____ hours per week, _____ weeks per year. Please describe the methodology used to calculate production capacity, and explain any changes in reported capacity (use additional pages as necessary).

² Report the data here for tablets your firm produced under a toll arrangement for which you are receiving a fee your production services. To the degree to which the product is shipped back to the tollee within the period of production those data should also be reported in line N of this data table.

³ Report the data here for tablets your firm received under a toll arrangement for which you paid a third party to convert into tablets. Any sales or shipments of the tablets into the market should be reported under commercial shipments, internal consumption, or transfers to related firms (e.g., not under "toll production returned).

⁴ Internal consumption and transfers to related firms must be valued at fair market value. In the event that your firm uses a different basis for valuing these transactions, please specify that basis (e.g., cost, cost plus, etc.) and provide value data using that basis for each of the periods noted above:

⁵ Toll production returned only applies to tollers who have converted powder/granular form calhypto to tablets for another firm and have shipped those tablets back to the tollee who will actually end up selling them into the market.

⁶ Identify your firm's principal export markets: _____.

II-12. CHANNELS OF DISTRIBUTION FOR TABLETED CALHYPO.--Report your firm's total U.S. commercial shipments of tableted calhypto, by channel of distribution from its U.S. establishment(s) during the specified periods.

Do not include information related to the repackaging operation. In Question III-4, please explain how financial information was allocated between the two operations.

Address questions on this part of the questionnaire to **David Boyland (202-708-4725, David.Boyland@usitc.gov)**.

Also, check signs accorded to the post operating income line items; the two expense line items should report positive numbers (*i.e.*, expenses are positive and incomes or reversals are negative--instances of the latter should be rare in those lines) while the income line item also in most instances should have its value be a positive number (*i.e.*, income is positive, expenses or reversals are negative).

If after reviewing and potentially revising the feeder data your firm has provided, the differences between your records and the calculated fields persist please identify and discuss the differences in the space below.

III-10. **Nonrecurring items (charges and gains) included in the subject product financial results.**--

For each annual and interim period for which financial results are reported in question III-9a, please specify all material (significant) nonrecurring items (charges and gains) in the schedule below, the specific table III-9a line item where the nonrecurring items are included, a brief description of the relevant nonrecurring items, and the associated values (*in \$1,000*), as reflected in table III-9a; *i.e.*, if an aggregate nonrecurring item has been allocated to table III-9a, only the allocated value amount included in table III-9a should be reported in the schedule below.
