PART I.--GENERAL INFORMATION

Background.

Every five years, the Commission must determine whether revocation of the antidumping and countervailing duty orders on citric acid and certain citrate salts from Canada and China would be likely to lead to continuation or recurrence of material injury within a reasonably foreseeable time. On July 7, 2014, the Commission determined that responses to its notice of institution of the subject five-year review were such that a full review pursuant to section 751(c)(5) of the Act should proceed.

Merchandise covered by the scope of these investigations.

“Citric acid and certain citrate salts” or the “subject product.”—covered by these investigations is defined as “all grades and granulation sizes of citric acid, sodium citrate, and potassium citrate in their unblended forms, whether dry or in solution, and regardless of packaging type. The scope also includes blends of citric acid, sodium citrate, and potassium citrate; as well as blends with other ingredients, such as sugar, where the unblended form(s) of citric acid, sodium citrate, and potassium citrate constitute 40 percent or more, by weight, of the blend. The scope of these investigations also includes all forms of crude calcium citrate, including dicalcium citrate monohydrate, and tricalcium citrate tetrahydrate, which are intermediate products in the production of citric acid, sodium citrate, and potassium citrate.

The scope of these investigations does not include calcium citrate that satisfies the standards set forth in the United States Pharmacopeia and has been mixed with a functional excipient, such as dextrose or starch, where the excipient constitutes at least 2 percent, by weight, of the product.

The scope of these investigations includes the hydrous and anhydrous forms of citric acid, the dihydrate and anhydrous forms of sodium citrate, otherwise known as citric acid sodium salt, and the monohydrate and monopotassium forms of potassium citrate. Sodium citrate also includes both trisodium citrate and monosodium citrate, which are also known as citric acid trisodium salt and citric acid monosodium salt, respectively.

Citric acid and sodium citrate are classifiable under subheadings 2918.14.00 and 2918.15.10 of the Harmonized Tariff Schedule of the United States (HTSUS), respectively. Potassium citrate and crude calcium citrate are classifiable under subheadings 2918.15.50 and 3824.90.92 of the HTSUS, respectively. Blends that include citric acid, sodium citrate, and potassium citrate are classifiable under subheading 3824.90.92 of the HTSUS. Although the HTSUS subheadings are provided for convenience and customs purposes, the written description of the merchandise is dispositive.”
