### FOREIGN PRODUCERS'/EXPORTERS' QUESTIONNAIRE

### **CERTAIN CORROSION-RESISTANT STEEL PRODUCTS**

This questionnaire must be received by the Commission by June 17, 2015

See last page for filing instructions.

The information called for in this questionnaire is for use by the United States International Trade Commission in connection with its antidumping and countervailing duty investigations concerning certain corrosion-resistant steel products ("corrosion-resistant steel") from China, India, Italy, Korea, and Taiwan (Inv. Nos. 701-TA-534-538 and 731-TA-1274-1278 (Preliminary)). The information requested in the questionnaire is requested under the authority of the Tariff Act of 1930, title VII.

Has your firm produced or exported corrosion-resistant steel (as defined on next page) at any time since

January 1, 2012?

#### PART I.—GENERAL INFORMATION

Background. This proceeding was instituted in response to a petition filed on June 3, 2015, by United States Steel Corporation (Pittsburgh, Pennsylvania), Nucor Corporation (Charlotte, North Carolina), Steel Dynamics Inc. (Fort Wayne, Indiana), California Steel Industries (Fontana, California), ArcelorMittal USA LLC (Chicago, Illinois), and AK Steel Corporation (West Chester, Oregon). Countervailing and/or antidumping duties may be assessed on the subject imports as a result of these proceedings if the Commission makes an affirmative determination of injury, threat, or material retardation, and if the U.S. Department of Commerce makes an affirmative determination of subsidization and/or dumping. Questionnaires and other information pertinent to this proceeding are available at <a href="http://usitc.gov/investigations/701731/2015/certain\_corrosion\_resistant\_steel\_products\_china/preliminary.htm">http://usitc.gov/investigations/701731/2015/certain\_corrosion\_resistant\_steel\_products\_china/preliminary.htm</a>

Corrosion-resistant steel. —The products covered by these investigations are certain flat-rolled steel products, either clad, plated, or coated with corrosion-resistant metals such as zinc, aluminum, or zinc-, aluminum-, nickel- or iron-based alloys, whether or not corrugated or painted, varnished or coated with plastics or other non-metallic substances in addition to the metallic coating, both in coils, 0.5 inch wide or wider (whether or not in successively superimposed layers and/or otherwise coiled, such as spirally oscillated coils), and also in straight lengths, which, if less than 4.75 mm in thickness, having a width that is 0.5 inch or greater and that measures at least 10 times the thickness; or, if of a thickness of 4.75 mm or more, having a width exceeding 150 mm and measuring at least twice the thickness. The products described above may be rectangular, square, circular, or other shape and include products of either rectangular or non-rectangular cross-section where such cross-section is achieved subsequent to the rolling process (i.e., products which have been "worked after rolling"); for example, products which have been beveled or rounded at the edges.

Steel products included in the scope of these investigations are products in which: (1) iron predominates, by weight, over each of the other contained elements; (2) the carbon content is 2 percent or less, by weight; and (3) none of the elements listed below exceeds the quantity, by weight, respectively indicated:

- 2.50 percent of manganese, or
- 3.30 percent of silicon, or
- 1.50 percent of copper, or
- 1.50 percent of aluminum, or
- 1.25 percent of chromium, or
- 0.30 percent of cobalt, or
- 0.40 percent of lead, or
- 2.00 percent of nickel, or
- 0.30 percent of tungsten, or
- 0.80 percent of molybdenum, or
- 0.10 percent of niobium (also called columbium), or
- 0.30 percent of vanadium, or
- 0.30 percent of zirconium

Unless specifically excluded, products are included regardless of levels of boron and titanium.

Specifically included in this scope are vacuum degassed, fully stabilized (commonly referred to as interstitial-free (IF)) steels and high strength low alloy (HSLA) steels. IF steels are recognized as low carbon steels with micro-alloying levels of elements such as titanium and/or niobium added to stabilize carbon and nitrogen elements. HSLA steels are recognized as steels with micro-alloying levels of elements such as chromium, copper, niobium, titanium, vanadium, and molybdenum.

All products that meet the written physical description, and in which the chemistry quantities do not exceed anyone of the noted element levels listed above, are within the scope of these investigations unless specifically excluded. The following products are outside of and/or specifically excluded from the scope of these investigations:

- Flat-rolled steel products either plated or coated with tin, lead, chromium, chromium oxides, both tin and lead ("terne plate"), or both chromium and chromium oxides ("tin free steel"), whether or not painted, varnished or coated with plastics or other non-metallic substances in addition to the metallic coating;
- Clad products in straight lengths of 0.1875 inch or more in composite thickness and of a width which exceeds 150 mm and measures at least twice the thickness; and
- Certain clad stainless flat-rolled products, which are three-layered corrosion-resistant carbon steel flat-rolled products less than 4.75 mm in composite thickness that consist of a carbon steel flat-rolled product clad on both sides with stainless steel in a 20%-60%-20% ratio.

**Reporting of information**.-- If information is not readily available from your records, provide carefully prepared estimates. If your firm is completing more than one questionnaire (i.e., a producer, importer, purchaser and/or foreign producer questionnaire), you need not respond to duplicated questions.

<u>Confidentiality</u>.--The commercial and financial data furnished in response to this questionnaire that reveal the individual operations of your firm will be treated as confidential by the Commission to the extent that such data are not otherwise available to the public and will not be disclosed except as may be required by law (see 19 U.S.C. §1677f). Such confidential information will not be published in a manner that will reveal the individual operations of your firm; however, general characterizations of numerical business proprietary information (such as discussion of trends) will be treated as confidential business information only at the request of the submitter for good cause shown.

<u>Verification</u>.--The information submitted in this questionnaire is subject to audit and verification by the Commission. To facilitate possible verification of data, please keep all files, worksheets, and supporting documents used in the preparation of the questionnaire response. Please also retain a copy of the final document that you submit.

**Release of information**.--The information provided by your firm in response to this questionnaire, as well as any other business proprietary information submitted by your firm to the Commission in connection with this proceeding, may become subject to, and released under, the administrative protective order provisions of the Tariff Act of 1930 (19 U.S.C. § 1677f) and section 207.7 of the Commission's Rules of Practice and Procedure (19 CFR § 207.7). This means that certain lawyers and other authorized individuals may temporarily be given access to the information for use in connection with this proceeding or other import-injury proceedings conducted by the Commission on the same or similar merchandise; those individuals would be subject to severe penalties if the information were divulged to unauthorized individuals.

### PART II.--TRADE AND RELATED INFORMATION

Further information on this part of the questionnaire can be obtained from **Mary Messer** 

(202-2	.05-319	3, mary.messer@usitc.gov). <b>S</b>	upply all data requested on a <u>calendar-year</u> basis.
II-1.		nission staff may contact that i	ify the responsible individual and the manner by which individual regarding the confidential information submitted
	Name		
	Title		
	Email		
	Telep	hone	
	Fax		
II-2.		-	cate whether your firm has experienced any of the following in of corrosion-resistant steel since January 1, 2012.
	(che	ck as many as appropriate)	(please describe)
		plant openings	
		plant closings	
		relocations	
		expansions	
		acquisitions	
		consolidations	
		prolonged shutdowns or production curtailments	
		revised labor agreements	
		other (e.g., technology)	

II-3.		<u>changes in operations</u> Does your firm anticipate any changes in the character of ns or organization (as noted above) relating to the production of corrosion-resistant future?
	□ No	Yes—Supply details as to the time, nature, and significance of such changes and provide underlying assumptions, along with relevant portions of business plans or other supporting documentation that address this issue. Include in the response a specific projection of your firm's capacity to produce corrosion-resistant steel (in short tons) for 2015 and 2016.

II-4a. Overall capacity and production.-- Please report your firm's production of products made on the same equipment and machinery used to produce corrosion-resistant steel, and the combined production capacity on this shared equipment and machinery.

"Average production capacity" or "capacity" –The level of production that your establishment(s) could reasonably have expected to attain during the specified periods for all products manufactured in that establishment using the same manufacturing equipment. Assume normal operating conditions (i.e., using equipment and machinery in place and ready to operate; normal operating levels (hours per week/weeks per year) and time for downtime, maintenance, repair, and cleanup; and a typical or representative product mix).

"Production" -- All production in your establishment(s) in China, India, Italy, Korea, and/or Taiwan, including production consumed internally within your firm.

	Calendar years			January-March

<u>RECONCILIATION OF SUBJECT CORROSION-RESISTANT STEEL PRODUCTION</u>.--The data reported for the production of subject corrosion-resistant steel in question II-3a (i.e., line G of this question, which automatically sums lines B, C, D, E, and F) should be equal to the production reported in question II-10 (i.e., line C).

		Calendar years	January-March		
Reconciliation	2012	2013	2014	2014	2015
II-3a line G –II-7 line C= should equal zero ("0"), if not revise data prior to					
submission.	0	0	0	0	0

<sup>&</sup>lt;sup>2</sup> Generally, total production (line I) will not exceed capacity (line A) in any given time period. If it does, please explain.

II-4b.		ting parametersThe production capacity (see definitions in instruction booklet) reported in based on operating hours per week, weeks per year.
II-4c.	capaci	ity calculationPlease describe the methodology used to calculate overall production ty reported in II-4a and explain how overall capacity in question II-3a was allocated to the t merchandise's average production capacity in question II-10.
II-4d.		ction constraintsPlease describe the constraint(s) that set the limit(s) on your firm's ction capacity.
II-4e.	Produ	ct shifting.—
	(i).	Is your firm able to switch production (capacity) between corrosion-resistant steel and other products using the same equipment and/or labor?
		No Yes (i.e., have produced other products or are able to produce other products). Please identify other actual or potential products:
	(ii).	Please describe the factors that affect your firm's ability to shift production capacity between products (e.g., time, cost, relative price change, etc.), and the degree to which these factors enhance or constrain such shifts.
II-5.		<u>of sales</u> What percentage of your firm's total sales in its most recent fiscal year was ented by sales of corrosion-resistant steel? percent.
II-6.	percer	estimated share of production in China, India, Italy, Korea, or TaiwanPlease estimate the stage of total production of corrosion-resistant steel in the country specified on the cation page accounted for by your firm's production in 2014 percent.
II-7.	the Ur	estimated share of country's exportsPlease estimate the percentage of total exports to nited States of corrosion-resistant steel from the country specified on the certification accounted for by your firm's exports in 2014 percent.

II-10. <u>Trade data</u>.--Report your firm's production capacity, production, shipments, and inventories related to the production of corrosion-resistant steel in your establishment(s) in China, India, Italy, Korea, and/or Taiwan during the specified periods.

<u>Do not submit data by manufacturing facility if they are in the same country.</u> If your firm has multiple manufacturing establishments within one country, you are required to combine data for those establishments within one foreign producer questionnaire response.

<u>Do not submit data on multiple countries combined</u>. The establishments reported here should all be located in the country of the firm's address reported on the certification page. Multinational companies with production in multiple subject countries should submit separate foreign producer questionnaire responses for each subject country.

"Shipments"--Shipments of products produced in your establishment(s) in China, India, Italy, Korea, and/or Taiwan. Quantities reported should be net of returns.

"Home market commercial shipments"--Shipments, other than internal consumption and transfers to related firms, within China, India, Italy, Korea, and/or Taiwan.

"Home market internal consumption/transfers to related firms"--Shipments made to related firms in China, India, Italy, Korea, and/or Taiwan, including product consumed internally by your firm.

**"Export shipments"**--Shipments to destinations outside China, India, Italy, Korea, and/or Taiwan, including shipments to related firms.

"Inventories"--Finished goods inventory, not raw materials or work-in-progress.

Note: As requested in Part I of this questionnaire, please keep all supporting documents/records used in the preparation of the trade data, as Commission staff may contact your firm regarding questions on the trade data. The Commission may also request that your company submit copies of the supporting documents/records (such as production and sales schedules, inventory records, etc.) used to compile these data.

#### II-10. <u>Trade data</u>--Continued.

II-12.	Other explanations: If your firm would like to further explain a response to a question in Part II
	that did not provide a narrative box, please note the question number and the explanation in
	the space provided below. Please also use this space to highlight any issues your firm had in providing the data in this section, including but not limited to technical issues with the MS Word questionnaire.

		-

# **HOW TO FILE YOUR QUESTIONNAIRE RESPONSE**

This questionnaire is available as a "fillable" form in MS Word format on the Commission's website at:

http://usitc.gov/investigations/701731/2015/certain corrosion resistant steel product s china/preliminary.htm

**Please do not attempt to modify the format or permissions of the questionnaire document**. Please submit the completed questionnaire using one of the methods noted below. If your firm is unable to complete the MS Word questionnaire or cannot use one of the electronic methods of submission, please contact the Commission for further instructions.

• <u>Upload via Secure Drop Box.</u>—Upload the MS Word questionnaire along with a scanned copy of the signed certification page (page 1) through the Commission's secure upload facility:

Web address: <a href="https://dropbox.usitc.gov/oinv/">https://dropbox.usitc.gov/oinv/</a> Pin: CORE

• E-mail.—E-mail your questionnaire to mary.messer@usitc.gov; include a scanned copy of the signed certification page (page 1). Please note that submitting your questionnaire by e-mail may subject your firm's business proprietary information to transmission over an unsecure environment and to possible disclosure. If you choose this option, the Commission warns you that any risk involving possible disclosure of such information is assumed by the submitter and not by the Commission.

**If your firm** <u>did not </u>**produce or export this product**, please fill out page 1, print, sign, and submit a scanned copy to the Commission.

<u>Parties to this proceeding</u>.—If your firm is a party to this proceeding, you are required to serve a copy of the completed questionnaire on parties to the proceeding that are subject to administrative protective order (see 19 CFR § 207.7). A list of such parties may be obtained from the Commission's Secretary (202-205-1803). A certificate of service must accompany the completed questionnaire you submit (see 19 CFR § 207.7). Service of the questionnaire must be made in paper form.
