GENERAL INFORMATION

Background.-- This proceeding was instituted in response to a petition filed on January 29, 2016, by United Steel, Paper and Forestry, Rubber, Manufacturing, Energy, Allied Industrial and Service Workers International Union ("USW"), Pittsburg, PA. Countervailing and/or antidumping duties may be assessed on the subject imports as a result of these proceedings if the Commission makes an affirmative determination of injury, threat, or material retardation, and if the U.S. Department of Commerce makes an affirmative determination of subsidization and/or dumping. U.S. producers of truck and bus tires have provided the USITC with allegations about sales or revenue that they have lost due to competition from imports of truck and bus tires from China. One or more domestic producer(s) have named your firm in such an allegation.

Truck and bus tires covered by these investigations are **new** pneumatic tires, of rubber, with a truck or bus size designation. Truck and bus tires covered by these investigations may be tube-type, tubeless, radial, or non-radial, and they may be intended for sale to original equipment manufacturers, fleet owners and operators, or the replacement market.

Subject tires have, at the time of importation, the symbol "DOT" on the sidewall, certifying that the tire conforms to applicable motor vehicle safety standards. Subject tires may also have one of the following suffixes in their tire size designation, which also appear on the sidewall of the tire:

TR – Identifies tires for service on trucks or buses to differentiate them from similarly sized passenger car and light truck tires;

MH – Identifies tires for mobile homes; and

HC – Identifies a 17.5 rim diameter code for use on low platform trailers.

All tires with a "TR," "MH," or "HC" suffix in their size designations are covered by these investigations regardless of their intended use.

In addition, all tires that lack one of the above suffix markings are included in the scope, regardless of their intended use, as long as the tire is of a size that is among the numerical size designations listed in the "Truck-Bus" section of the Tire and Rim Association Year Book, as updated annually, unless the tire falls within one of the specific exclusions set out below.

Truck and bus tires, whether or not mounted on wheels or rims, are included in the scope. However, if a subject tire is imported mounted on a wheel or rim, only the tire is covered by the scope. Subject merchandise includes truck and bus tires produced in the subject country whether mounted on wheels or rims in the subject country or in a third country. Truck and bus tires are covered whether or not they are accompanied by other parts, e.g., a wheel, rim, axle parts, bolts, nuts, etc. Truck and bus tires that enter attached to a vehicle are not covered by the scope.

Specifically excluded from the scope of these investigations are the following types of tires:

- (1) pneumatic tires, of rubber, that are not new, including recycled and retreaded tires; and
- (2) non-pneumatic tires, such as solid rubber tires.

The subject merchandise is currently imported under Harmonized Tariff Schedule of the United States ("HTSUS") statistical reporting numbers: 4011.20.1015 and 4011.20.5020. Tires meeting the scope description may also be imported under the following HTSUS provisions: 4011.99.4520, 4011.99.4590, 4011.99.8520, 4011.99.8590, 8708.70.4530, 8708.70.6030, and 8708.70.6060. While HTSUS subheadings are provided for convenience and for customs purposes, the written description of the subject merchandise is dispositive.
