GENERAL INFORMATION

Background. This proceeding was instituted in response to a petition filed on June 30, 2016, by Eastman Chemical Company, Kingsport, Tennessee. Antidumping duties may be assessed on the subject imports as a result of this proceeding if the Commission makes an affirmative determination of injury, threat, or material retardation, and if the U.S. Department of Commerce makes an affirmative determination of dumping. Questionnaires and other information pertinent to this proceeding are available at http://www.usitc.gov/investigations/701731/2016/dioctyl_terephthalate_dotp_korea/preliminary.htm.

Diocetyl terephthalate ("DOTP").--The product covered by this investigation is dioctyl terephthalate ("DOTP"), regardless of form. DOTP that has been blended with other products is included within this scope when such blends include constituent parts that have not been chemically reacted with each other to produce a different product. For such blends, only the DOTP component of the mixture is covered by the scope of this investigation. DOTP that is otherwise subject to this investigation is not excluded when commingled with DOTP from sources not subject to this investigation. Commingled refers to the mixing of subject and non-subject DOTP. Only the subject component of such commingled products is covered by the scope of the investigation. DOTP has the general chemical formulation $C_6H_4(C_8H_{17}COO)_2$ and a chemical name of "bis (2-ethylhexyl) terephthalate" and has a Chemical Abstract Service ("CAS") registry number of 6422-86-2. Regardless of the label, all DOTP is covered by this investigation. Subject merchandise is currently classified under subheading 2917.39.20 of the Harmonized Tariff Schedule of the United States ("HTSUS"). Blends containing DOTP may also be classified under subheading 3812.20.10. While the CAS registry number and HTSUS classification are provided for convenience and customs purposes, the written description of the scope of this investigation is dispositive.
