NASS Review of OMB No. 0584-NEW

Evaluation of Demonstration Projects to End Childhood Hunger (EDECH)

April 8, 2015

Review Conducted by Audra Zakzeski at NASS / MD / SEDMB / CDS

My only comment is for the researchers to provide additional explanation for why they are treating Nevada as a household level random assignment and the other research areas as a clustered random assignment. They did a good job explaining how each different type of analysis would be handled but I'm still not clear regarding why.

Other than that, everything looked good to me.

Audra Zakzeski
