PURPOSE: The information obtained from the Sugar Shockers Health Campaign (SSHC) Survey will provide data about the impact of the Catawba Service Unit’s planned three month health campaign to reduce consumption of sugar sweetened sodas and beverages. The SSHC Survey will also be made available to tribal members at the different tribal programs (day care, head start, after school program, teen program, senior program) on a voluntary basis prior to the beginning of the SSHC and then again after the SSHC. There is no personally identifiable information on the SSHC Survey. There are 11 questions on the survey; nine are categorical questions with answer choices provided and two are opened ended questions. BURDEN HOURS

Category of Respondent	No. of Respondents	Participation Time	Burden
Individuals – Patients at the Catawba Service Unit	50 pre- and 50 post-intervention (100 total)	5 minutes	8.33 hrs
Individuals - Tribal members enrolled in tribal programs	50 pre- and 50 post-intervention (100 total)	5 minutes	8.33 hrs
Totals	100 pre- and 100 post-intervention (200 total)	5 minutes	16.66 hrs

FEDERAL COST: The estimated annual cost to the Federal government is \$133.40.

One staff person spends about 2 minutes on each survey tallying the response rates, collecting the information and reporting the totals in a reporting template. If 200 surveys are completed, this equals about 6 hours and 40 minutes. A GS 9 rate of about \$20 per hour x 6.67 hours is \$133.40.

Note – this survey will be conducted both pre- and post-intervention as an evaluation tool. This is a one-time intervention and so this cost is not an annual cost but a one-time cost.

If you are conducting a focus group, survey, or plan to employ statistical methods, please provide answers to the following questions:

The selection of your targeted respondents

1. Do you have a customer list or something similar that defines the universe of potential respondents and do you have a sampling plan for selecting from this universe?

If the answer is yes, please provide a description of both below (or attach the sampling plan)? If the answer is no, please provide a description of how you plan to identify your potential group of respondents and how you will select them?

The respondent universe will include (1) the tribal members who participate in the Catawba Indian Nation tribal programs (see table below for additional info) and (2) tribal members who participate in health education activities of the SSHC provided by the Catawba Service Unit. All tribal members who participate in these educational activities will be asked to complete the survey but participation will be voluntary.

ISWA Head Start	Staff and parents
Catawba Cultural Center	Staff, program participants (children), and parents
Catawba Teen Center	Staff, program participants (children)

The respondent universe will also include all registered patients at the Catawba Service Unit. Patients seen at the service unit during two different one-week periods will be asked to complete the survey but participation will be voluntary. The two different one-week periods will occur prior to the health education activities as part of the SSHC (the pre-intervention surveys) and after the activities (the post-intervention surveys). These two specific one-week periods will occur approximately three months apart.
