Country Director, CDC Country Office  
US CDC – South Caucasus (Republic of Georgia  
Office); Global Disease Detection  
Georgia National Center for Disease Control and  
Public Health  
9 M. Asatiani St.  
Tbilisi, 0177 Georgia

Dear Dr. Morgan:

The Georgian National Center for Disease Control and Public Health is seeking your assistance with an ongoing Crimean-Congo Hemorrhagic Fever outbreak. As you know, 22 cases, including 3 deaths, have been reported this year in Georgia. This is the largest number of yearly reported cases since CCHF was initially diagnosed here in 2009.

I am requesting your support in conducting an investigation among the at risk population to aid in determining the route of transmission and risk factors needed to control the outbreak and aid our public health prevention campaigns in Georgia. It is our pleasure to coordinate this assistance with the local CDC Office based at Georgia NCDC and your Division. We would be pleased to hear from you as soon as possible.

Sincerely,

Director General

Amiran Gamkrelidze
