Public reporting burden of this collection of information is estimated to average 15 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to CDC/ATSDR Reports Clearance Officer, 1600 Clifton Road NE, MS D-74 Atlanta, Georgia 30333; ATTN: PRA (0920-1011).

## **Instructions to fill the Dengue Case Investigation Report**

Law 81 of 1912 establishes that dengue and dengue hemorrhagic fever are reportable diseases to the Puerto Rico Department of Health. The health provider will complete in **print lettering** every question of the Dengue Case Investigation Report and will accompany the serum sample with this form. Please verify that the date of onset of symptoms and the date the serum sample was obtained are included. Without this information the sample will not be processed. On the upper left corner of the form, write the date (day, month, year) in which the report was completed.

**Patient Data** The complete name and information of the patient is essential because many persons have similar names and information.

- Check Yes or No to indicate whether or not the patient was hospitalized due to this illness. If the patient was hospitalized, write the name of the hospital.
- Print the name and surnames of the patient in the following order: paternal and maternal surnames, first name and middle name or initial.
- If the patient is a minor, print the name of the parent or primary caregiver. Please, write the surnames first and then the first name.
- Check if the patient died or not. If you do not know this information, check Unk for unknown.
- Check if patient presents or does not present mental status changes. This information is important because these changes could be associated with encephalitis.

**Home Address** Obtaining the address where the patient resides will allow us to follow-up on the patient and to implement vector control measures in specific areas as needed.

- If the patient lives in an urban area, print the name of the area, street name or number, block and house number, City/Town and ZIP code + 4 digits where patient resides.
- If the patient lives in a suburb, print the road number, kilometer, house or premise number, county, sector, City/Town and ZIP code + 4 digits where patient resides.
- If the patient lives in a condominium or public housing, print apartment number, building, name of condominium or housing complex, street, City/Town where patient resides and ZIP code + 4 digits.
- Print the patient's phone number and an alternate phone number where we could contact the patient.
- Indicate a reference point close to the patient's home (Example: next to Rivera's Grocery Store).
- If the patient has a job, write the name of the employer, including street or sector and City/Town.

**Physician who referred this case** This information is critical, since, by law, results will only be mailed to service providers.

- Print the name of the physician who referred the patient for a dengue test, last name first.
- Write the telephone and extension numbers, fax and Email of the physician attending the patient.
- In the block "Send laboratory results to" print the complete mailing address of the physician submitting the sample. Please, fill all blanks including the ZIP code + 4 digits to guarantee you receive the results.

### **Patients Demographic Information**

- Write the patient's date of birth (day, month and year).
- Indicate patient's age. Write the age in months if the patient is an infant or in years if older than 1 year of age.
- Check the M box for male or F for female. If female, please indicate if the patient is pregnant and how many gestational weeks, if known.

### **Who filled out this form?**

- Print the complete name (last name first) of the person filling the form.
- Indicate your relationship with the patient (e.g.: mother, father, primary caregiver, physician).
- Write the phone number, fax or e-mail address.

### **MUST HAVE information for sample processing WITHOUT THIS INFORMATION THE SAMPLE WILL NOT BE PROCESSED.**

- Day, month and year of first symptom.
- Day, month and year blood samples were taken.
- If sample is tissue, specify type of tissue (e.g. kidney, spleen, heart, etc.) to be sent to our laboratory and the date the sample was taken.

### **Additional Patient Data**

- Indicate how many years you have lived at your current address.
- Specify country of birth
- Answer Yes, No or Unk if unknown when asked if patient has been diagnosed with dengue before.
  - If the response is Yes, indicate month and year in which the patient had dengue before this illness.
  - Check Unk if the patient does not know the date when diagnosed with dengue before.
- If the patient traveled to other countries or cities 14 days before beginning of symptoms check "Yes, another country" or "Yes, another city". If the patient did not travel or doesn't remember, check No or Unk if unknown.
- If the patient traveled, indicate country or city visited by the patient 14 days before beginning of symptoms.

### **Criteria for Dengue Hemorrhagic Fever, Shock and other symptoms**

Check (✓) the boxes to mark Yes, No, or Unk for each question related to symptoms. **Please answer ALL questions.** In the space provided:

- Write the platelet count for the last known test during this illness.
- Write the patient's lowest and highest hematocrit during this illness.
- Indicate the albumin and protein counts
- Record the lowest blood pressure during this illness - Indicate systolic and diastolic blood pressure values.
- Calculate the pulse pressure by subtracting the systolic minus diastolic. Calculate the minimal pulse pressure using the arterial pressure which subtraction results in the lowest number.
- Write the lowest White Blood Cell Count (WBC) during this illness.

**Do not complete the blanks on the back of the form. These are for laboratory use only.**
