Question Text	A learning disability is a disorder in one or more of the basic psychological processes involved in understanding or in using language, spoken or written. It may be evident by an inability to listen, think, speak, read, write, spell or do mathematical calculations. It includes conditions such as brain injury, minimal brain dysfunction, dyslexia or aphasia. It does not apply to children who have difficulty learning as a result of visual, hearing, motor, mental retardation, or emotional disturbance.

Question Text	<p>A [b] physical therapist [b] is a health care professional skilled in working with persons with health problems resulting from injury, disease, or developmental problems. A physical therapist diagnoses muscle and joint problems and provides exercises and treatments.</p> <p>A [b] speech therapist [b] is a health care professional skilled in working with communication and language disorders. Speech pathologists diagnose speech and language problems and provide therapy including treatment for stuttering, impaired articulation, or language or voice impairment.</p> <p>A [b] respiratory therapist [b] is a health care professional skilled in working with persons with respiratory difficulties. Respiratory therapists treat and manage the care of persons with respiratory diseases. This may include administration of breathing treatments, oxygen, and education of patients in regards to respiratory treatment procedures.</p> <p>An [b] audiologist [b] is a health care professional skilled in working with hearing problems. An audiologist diagnoses hearing problems and their nature, and determines if a person can benefit from using hearing aids.</p> <p>An [b] occupational therapist [b] is a health care professional skilled in working with health problems resulting from injury, disease, or developmental problems. Occupational therapy involves working on functional activities such as dressing, feeding, and writing.</p>
