

Thank you for participating in this study. Once again, the goal is to learn about your perspectives as a pharmacist about the appearance of the prescription pills that you dispense. The survey contains a series of questions regarding changes in pill appearance, followed by additional background questions.

Please keep in mind:

- This survey requires no outside materials and your responses will not be linked to your personal information.
- We plan to widely disseminate the results of this survey in peer-reviewed journals. The survey is designed to take no more than 20 minutes to complete.
- The Institutional Review Board at Brigham and Women's Hospital has approved this protocol. Your participation is voluntary.

We appreciate your contribution to this important topic.
