Q105 Hello, this is _____ from _____, a national research firm. We are conducting a survey about prescription medications. We are working with a team of physicians at Harvard Medical School and Brigham and Women's Hospital on a study funded by the Food and Drug Administration. Your participation is voluntary. Is now a good time for you to answer some questions?

(IF NEEDED: The survey takes approximately 10-20 minutes, depending on your responses.)

(IF NEEDED: All of your answers will be kept confidential. Your answers will be grouped with hundreds of other people's answers so that there is no possibility of identifying you or your answers.)

(IF NEEDED: The information you provide will only be used for research purposes.)

(IF NEEDED: Your telephone number was randomly generated by our computer system.)

SECTION 200: PILL APPEARANCE PREFERENCES AND PERCEPTIONS**BASE: ALL QUALIFIED RESPONDENTS**

Q205 We are working with teams at Harvard Medical School and the FDA. The goal is to learn about your views on how your prescription drugs look. This survey will help guide future work aimed at promoting positive health outcomes among patients like you. Your answers will be confidential and grouped with hundreds of other people's answers so there is no possibility of identifying you.

Before we begin, I would like to mention that there are two types of prescription drugs: 1. brand-name drugs, and 2. generic drugs. A **brand-name** drug is made by a single company, usually the first to sell the drug. After the company's patent on the brand-name drug runs out, other companies can make and sell the drug; this is called the **generic** version of the drug. Generic drugs typically look different from the brand-name version. Generic versions of the same drug from different manufacturers can look different from each other. These differences in **appearance** can include pill **color, shape, size, and any markings (such as text, lines, grooves, or designs)** printed on the pill. This survey is about these differences.

Note: When I say the word "pill" in this survey, I mean drugs like capsules or tablets.

BASE: ALL QUALIFIED RESPONDENTS

Q210 The first series of questions has to do with pill **appearance**. Appearance includes the pill's **color, shape, size, and any markings (such as text, lines, grooves, or designs)** printed on the pill.

Thinking about the last year, which of the following best describes how pill appearance relates to your medication use? Do you...? (INTERVIEWER: READ LIST)

[PN: SHOW HALF RESPONDENTS CODES 1-4 AND FOR HALF FLIP THE SCALE TO DISPLAY 4-1.]

- 1 Always rely on pill appearance to make sure you take the correct medication
- 2 Usually rely on pill appearance to make sure you take the correct medication
- 3 Rarely rely on pill appearance to make sure you take the correct medication
- 4 Never rely on pill appearance to make sure you take the correct medication
- 8 Don't know or don't recall (VOL)
- 9 Decline to answer (VOL)

BASE: ALL QUALIFIED RESPONDENTS

Q215 In the last year, how frequently did you refill a prescription in which the pill you received differed in **appearance** from the pills you received with the **immediately prior** prescription? (INTERVIEWER: READ LIST)

[PN: SHOW HALF RESPONDENTS CODES 1-4 AND FOR HALF FLIP THE SCALE TO DISPLAY 4-1.]

- 1 4 or more times
